

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Algeria. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself — and congratulations on finishing primary school! It's great that you're thinking carefully about your next step. Let's break it down to help you choose a path that suits your interests, strengths, and future goals.

Key factors to consider

- ✓ What subjects do you enjoy most? (e.g., languages, science, technology, arts)
- ✓ Do you prefer hands-on/practical learning or more academic/theoretical study?
- ✓ Are you aiming for university in the future or a faster route to a career?
- ✓ What are your hobbies or passions that could guide your choice?

Common educational paths after primary school in Denmark

Since you're 16, you're likely looking at upper secondary education. Here are the main options:

Gymnasiale uddannelser (General upper secondary education)

These are good if you want to keep many doors open and maybe aim for university later.

- **STX (Studentereksamen)** → General upper secondary school, broad academic subjects (humanities, natural sciences, social sciences).
- **HHX (Højere Handelseksamen)** → Focus on business, economics, and languages.
- **HTX (Højere Teknisk Eksamen)** → Focus on technology, science, and innovation.
- **HF (Højere Forberedelseseksamen)** → Shorter (2 years), more practical, good if you want a flexible or faster path to higher education.

 *Recommended if you like academic study, want a university degree later, or are unsure and want to keep options open.*

Erhvervsuddannelser (Vocational education and training)

- Learn a trade while combining school and apprenticeship (e.g., electrician, carpenter, hairdresser, IT support, chef).

- More practical, you earn money during your apprenticeship.
- You can later take supplementary courses to qualify for higher education.

💡 *Recommended if you want to learn by doing and start working sooner.*

✨ Other opportunities

- **EUX** → Combines vocational training with a gymnasium-level exam — you can learn a trade and still qualify for university.
- **10th grade** → Some students choose an extra year to strengthen skills before upper secondary.

📝 My suggestion

- 👉 If you enjoy studying and want to keep many future paths open (university, professional fields), **STX** or **HTX** could be excellent.
- 👉 If you're passionate about business or want to explore entrepreneurship, **HHX** is great.
- 👉 If you prefer practical learning and want to work sooner or explore a trade, consider **EUD** or **EUX**.

☀️ Next steps

- ✅ Visit open house events at local schools.
- ✅ Talk to a study counselor (vejleder) — they can help match your interests to the right program.
- ✅ Think about your dreams: Do you see yourself at university? Starting a business? Working with technology?

If you tell me more about your interests, hobbies, and what you liked best in school, I can give an even more personalized recommendation! Would you like to share that? 😊
