

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Andorra. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing that about yourself — it sounds like you're at an exciting crossroads! Let's break this down thoughtfully, taking into account your background, interests (where possible), and opportunities in Denmark.

Your current situation

- You're 16 and have completed primary school (likely *Folkeskole* or equivalent).
- You're fluent in Danish.
- You have a multicultural background (Andorran roots, Danish upbringing).

What are your options in Denmark after primary school?

In Denmark, after *Folkeskole*, most students choose between these paths:

- 1 Gymnasium (STX)** – General upper secondary education with a broad academic focus (sciences, humanities, social sciences). Prepares for university.
- 2 HTX (Higher Technical Examination Programme)** – Focus on technology, natural sciences, and innovation. Good if you like science, engineering, or IT.
- 3 HHX (Higher Commercial Examination Programme)** – Focus on business, economics, marketing, international trade. Good for business-oriented minds.
- 4 HF (Higher Preparatory Examination)** – Shorter (2-year) academic upper secondary programme, more flexible, often for those who prefer a different pace or who didn't go straight into gymnasium after primary school.
- 5 Vocational education and training (EUD/Erhvervsuddannelse)** – Combines school with apprenticeships in a trade (e.g. carpenter, chef, electrician, health care). Great if you prefer practical learning and want to work sooner.
- 6 Other alternatives** – Eg. international schools, boarding schools (*efterskole* or *kostskole*), special talent programs, or taking a gap year (often with travel or work).

How to choose?

 Ask yourself:

- Do I enjoy academic subjects and want to go to university later?
→ **Gymnasium (STX), HTX, HHX or HF** could be good.
- Do I prefer practical, hands-on work and want to get job-ready sooner?
→ **EUD/VET** might suit you.
- Am I passionate about business, tech, arts, sciences?
→ HTX = tech/science; HHX = business; STX = broad/academic.
- Do I want to explore more before deciding?
→ Some do a year at *efterskole* to grow personally and try new subjects.

Extra thoughts for you

Since you have roots in Andorra and a Danish upbringing:

- ✓ Consider an education path that keeps doors open for international studies or work later (e.g. STX, HTX, HHX).
- ✓ Language skills (Danish + potentially Spanish/French/Catalan/English?) could give you an edge in international business, diplomacy, tourism, or tech.

My recommendation

If you're undecided:

- ➔ **STX or HTX** — These give you a solid, general education and keep lots of options open for university or other higher education.
- ➔ If you have an interest in business, **HHX** could be great — especially with your international background.
- ➔ If you prefer a practical career path, **EUD/VET** is an excellent option too — highly respected in Denmark.

Next step:

- Talk to a guidance counselor (*Studievejleder*).
- Visit open house events at local schools.
- Maybe try job-shadowing or internships to explore interests.

If you'd like, tell me:

- 👉 What are your favorite subjects or hobbies?
- 👉 Do you have any idea of what you'd like to work with in the future?

That way, I can help you narrow this down even more! 😊
