

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Argentina. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question — and it's fantastic that you're already thinking carefully about your next steps! Since you've finished primary school in Denmark (9th or 10th grade), you're now at a point where you can choose between several different educational paths. I'll break them down and give you recommendations based on different factors.

Your main options after primary school in Denmark

Gymnasium (STX, HHX, HTX)

- General upper secondary education that prepares you for university.
- **STX**: General academic subjects, humanities, sciences — broadest option.
- **HHX**: Focus on business, economics, and marketing.
- **HTX**: Focus on technical and natural sciences (engineering, technology).

 Good for: If you enjoy academic subjects and think you might want to go to university later.

HF (Higher Preparatory Examination)

- A 2-year upper secondary programme (usually for students who want a shorter path or who took a break after primary school).
- More practice-oriented than STX, but still gives university access.

 Good for: If you want flexibility or are not sure about 3 years of gymnasium.

Erhvervsuddannelse (VET - Vocational education and training)

- A combination of school and apprenticeship at a company.
- You train for a specific trade: e.g. carpenter, chef, electrician, hairdresser, IT support, etc.

 Good for: If you want to get practical experience and start working sooner, or if you're passionate about a trade.

International or bilingual options

- Since you have Argentine roots and are bilingual, you could also consider:

- **International gymnasium (IB)** — International Baccalaureate.
- Schools that offer Spanish as part of their programme.
- ✓ Good for: If you see yourself studying or working internationally in the future.

💡 What to consider when choosing:

- **What subjects do you enjoy most?** (E.g. maths, science, languages, arts, business...)
- **How do you like to learn?** (More practical/hands-on → VET. More academic/theoretical → STX/HTX/HHX.)
- **Do you think you want to go to university?** (If yes, gymnasium or HF is a good fit.)
- **Do you want to work sooner?** (VET gets you into the workforce faster.)

🌟 My suggestion (based on what you've shared)

➡ Since you're fluent in Danish, have Argentine roots, and have just finished primary school in Denmark:

- If you enjoy academic subjects → consider **STX** (broadest) or **HHX** (if you like business/economy).
- If you like tech and science → **HTX** could be great.
- If you want practical training → look at **VET** programmes that match your interests.
- If you're curious about the world and maybe studying abroad → **International Baccalaureate (IB)**.

🚀 Next steps

- ✓ **Visit open house events** at schools you're considering.
- ✓ **Talk to your school counsellor** (UU-vejleder) — they can help you explore your strengths.
- ✓ **Look at the websites of local gymnasiums and vocational schools** — they often have sample timetables and student stories.

👉 If you tell me more about your interests (what subjects you like, hobbies, future dreams), I can help narrow it down even further! Would you like that?
