

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Austria. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

It's great that you're thinking carefully about your next step! In Denmark, after completing *folkeskolen* (primary/lower secondary school), you have several options depending on your interests, strengths, and future goals. Let's break down some paths you might consider:

General Upper Secondary Education (Gymnasiale uddannelser)

These programs prepare you for higher education (university, university college).

1 STX (Almen studentereksamen)

- Broad academic focus (humanities, social sciences, natural sciences).
- Good if you're interested in keeping many options open for university.

2 HHX (Højere handelseksamen)

- Focus on business, economics, and international studies.
- Suitable if you're interested in commerce, marketing, or entrepreneurship.

3 HTX (Højere teknisk eksamen)

- Focus on technology, natural sciences, and technical subjects.
- A great fit if you like STEM (science, technology, engineering, math).

4 HF (Højere forberedelseseksamen)

- Shorter, 2-year program.
- More practical/thematic and for students who prefer fewer written exams or need flexibility.

Vocational Education and Training (Erhvervsuddannelser, EUD)

- Combines school with apprenticeships (practical training at a company).
- Leads directly to a job or you can continue studying (e.g., vocational academy).
- Good if you want hands-on work (e.g., electrician, chef, carpenter, health worker).

Other Options

- **International Baccalaureate (IB):** If you're interested in an international environment. Especially interesting given your Austrian background — could open doors to studying abroad.
- **Kombinationsuddannelser:** Some schools offer combinations (e.g., EUX) that give both a vocational qualification and a general upper secondary certificate, allowing both work and university options.

How to choose?

 Consider:

- What subjects do you enjoy the most?
- Do you like academic work, practical tasks, or a mix?
- Do you plan to study at university or enter the workforce sooner?
- Are you interested in staying in Denmark long-term or going abroad (maybe to Austria or elsewhere)?

 Tip: Many schools offer *brobygning* (bridging courses) or *introduktionskurser* — short programs where you can try different paths before committing.

If you want, I can help you:

- ☒ Make a pros/cons list for each path
- ☒ Find specific schools near you
- ☒ Explore what future jobs or university degrees different paths can lead to

Would you like that? And do you have any particular subjects or careers in mind already?
