

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Belgium. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question — and it's wonderful that you're thinking carefully about your next steps! Since you've just finished primary school (or *folkeskole*), and you're 16, you're at the point where most young people in Denmark choose an upper secondary education (*ungdomsuddannelse*). Let's break down your options and things to consider:

Main educational paths in Denmark after primary school

1 Gymnasiale uddannelser (General upper secondary education)

These are academic programs that prepare you for higher education (university, university colleges). The main types are:

- **STX (Alment gymnasium)** — broad academic focus on humanities, natural sciences, and social sciences. Good if you want to keep many doors open.
- **HHX (Handelsgymnasium)** — focus on business, economics, marketing. Great if you're interested in commerce or international business.
- **HTX (Teknisk gymnasium)** — focus on technology, science, and engineering. Suitable if you like STEM subjects.
- **HF (Højere forberedelseksamen)** — 2-year program (instead of 3) for those who want a shorter, more practice-oriented route to higher education.

2 Erhvervsuddannelser (Vocational education and training - EUD)

If you prefer to combine school and hands-on work experience, you can choose a vocational path. This could lead to trades like carpenter, electrician, chef, healthcare assistant, or even IT-specialist. Many of these programs include apprenticeships in real companies.

3 Other options

- **International programs:** Given your Belgian background, you might look into an International Baccalaureate (IB) program if you want an international environment and more flexibility for studying abroad later.
- **Combination programs:** EUX combines vocational training with a gymnasium-level exam, giving you both practical skills and the possibility to go on to higher education.

What should guide your decision?

- ✓ **Your interests** — Do you enjoy academic subjects? Are you more practical or theoretical?
 - ✓ **Your future goals** — Do you see yourself at university, or do you want to start working sooner?
 - ✓ **Your learning style** — Do you prefer classroom learning, or do you thrive in hands-on, real-world environments?
 - ✓ **Language and culture** — Since you're fluent in Danish but have Belgian roots, would you like an international element in your studies?
-

🌟 A personal recommendation

Since you're fluent in Danish, born and raised in Denmark, and have the opportunity to benefit from the Danish education system:

- **If you want broad academic possibilities** → STX is a safe choice that keeps many doors open.
 - **If you're interested in business or might want to work internationally (e.g., Belgium or EU)** → HHX or IB could be excellent.
 - **If you enjoy working with your hands or want to learn a trade** → vocational education (EUD or EUX) could suit you.
-

If you'd like, I can help you:

- ✓ Compare specific schools or programs near where you live
- ✓ Create a plan for how to apply
- ✓ Explore options if you're considering studying in Belgium later

Would you like help with that? And do you have any particular interests (e.g., science, arts, business, technology)?
