

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Belize. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question, and it's fantastic that you're thinking carefully about your next step! Let's break it down based on your situation and the Danish educational system. Since you've finished primary school (folkeskole), you have several good options, depending on your interests, strengths, and goals.

Your main options after folkeskole

1 Gymnasium (STX)

- Focus: Broad academic subjects (sciences, humanities, social sciences).
- Good for: If you want to keep your options open for university.
- Duration: 3 years.
- Leads to: Access to universities and higher education.

2 HHX (Higher Commercial Examination Programme)

- Focus: Business, economics, international trade.
- Good for: Interest in business, marketing, finance, or international studies.
- Duration: 3 years.
- Leads to: Business schools, universities.

3 HTX (Higher Technical Examination Programme)

- Focus: Science, technology, engineering, IT.
- Good for: If you're into STEM fields, innovation, or applied sciences.
- Duration: 3 years.
- Leads to: Technical universities, engineering schools, etc.

4 EUX (combined vocational and academic education)

- Focus: Vocational training + general subjects.
- Good for: If you want both hands-on skills and the possibility of higher education.
- Duration: 4–5 years.
- Leads to: Jobs + higher education eligibility.

5 Erhvervsuddannelse (vocational education)

- Focus: Learning a trade (e.g. carpenter, chef, electrician).
- Good for: If you prefer practical work and want to start a career earlier.
- Duration: 2–5 years (depending on program).
- Leads to: Skilled work + sometimes further study.

6 International options (e.g. International Baccalaureate - IB)

- Focus: International academic curriculum, in English.
- Good for: If you're considering studying abroad later, or want a global profile.

How to decide?

Here are some questions you can ask yourself:

- **Do I enjoy theoretical studies, or do I prefer practical, hands-on work?**
- **Do I want to go to university, or do I want to enter the job market sooner?**
- **Am I curious about business, technology, arts, science, or something else?**
- **Would I like an international education (given your Belizean roots)?**

★ Recommendation based on what you've shared

Since you're fluent in Danish, born in Denmark, and have completed folkeskole, all options are open to you.

👉 If you like to study and want to keep doors open to higher education, **STX** or **HHX** could be great.

👉 If you're interested in technology or science, **HTX** would fit well.

👉 If you'd like both a trade and study opportunities, **EUX** is a strong choice.

👉 If you're drawn to practical work and want a quicker route into a profession, **erhvervsuddannelse** could suit you.

👉 If you're curious about an international experience, consider **IB** (often offered at certain gymnasiums).

Next steps

- ✓ Visit open house events ("Åbent Hus") at local schools to get a feel for them.
- ✓ Talk to a school counselor ("UU-vejleder") — they can give tailored advice.
- ✓ Make a list of your interests and strengths — I can help you with that too if you want!

If you'd like, tell me:

👉 What subjects you enjoy most?

👉 What kind of work or study you imagine yourself doing in the future?

👉 Do you want to stay in Denmark long-term, or would you consider studying/working abroad?

That will help me guide you even better!
