

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Bulgaria. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

That's a great and important decision you're facing—thanks for sharing some context! I'll break down your options and give you some recommendations based on your situation as a 16-year-old in Denmark who has completed primary school:

Typical options after primary school (folkeskole) in Denmark

Since you've finished primary school, you're now choosing your upper secondary education (ungdomsuddannelse). Your main options are:

Gymnasiale uddannelser (General upper secondary education)

These prepare you for university or higher education. Examples:

- **STX (Alment gymnasium)** – Broad general education with focus on sciences, humanities, or social studies.
- **HHX (Handelsgymnasium)** – Focus on business, economics, and international trade.
- **HTX (Teknisk gymnasium)** – Focus on technology, science, and engineering.
- **HF (Højere forberedelseseksamen)** – A shorter, 2-year program, usually for older students or those wanting a more practical academic route.

 Good if:

- You enjoy academic subjects.
- You might want to study at university later.
- You're not sure yet what career you want.

Erhvervsuddannelser (Vocational education & training - EUD)

These combine school and apprenticeship with a company, leading to a trade or profession (e.g. carpenter, electrician, chef, hairdresser).

 Good if:

- You like hands-on, practical work.

- You want to start earning while you learn.
- You know which trade interests you.

Kombinationsuddannelser

For example, **EUX** combines vocational training with a gymnasial level so you can both learn a trade *and* qualify for university.

 Good if:

- You want both practical experience and the option for further academic study.
- You're hardworking and motivated.

Things to consider for your decision

- What subjects do you enjoy most? (Math, science, languages, business, design?)
- Do you prefer academic study or practical work?
- Do you want to go to university eventually, or start working sooner?
- Would you like an international angle? (e.g. HHX could link well to business between Denmark and Bulgaria.)

My recommendation (based on what you shared)

Since you're fluent in Danish, born in Denmark, and have a multicultural background:

 If you like academic study and want flexibility, **STX** or **HHX** would be great. They give you many options later, including university in Denmark or abroad. HHX could also connect nicely to your Bulgarian background if you see yourself in business or international work.

 If you want practical and academic together, consider **EUX**.

 If you already know you want a specific trade, an **EUD** pathway is a strong choice too.

Next steps

-  Visit some local schools and attend open house events (orieringsaften).
-  Talk to your guidance counselor (UU-vejleder).
-  Maybe do a short internship or try a camp (brobygning) to see what fits.

If you tell me more about your interests (favorite subjects, hobbies, what you imagine doing in the future), I can give you a more tailored recommendation! Do you have any ideas yet? 😊
