

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Central African Republic. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing your background — it's great that you're thinking carefully about your next steps! Since you've finished primary school (folkeskolen), you now have several educational paths available in Denmark, depending on your interests, strengths, and future goals. Let's break it down:

🎓 Main options after primary school in Denmark

1 Gymnasial uddannelse (Upper secondary education) — academic track

- **STX (Almen studentereksamen)** — broad, academic education; good if you want to keep many doors open for university.
- **HHX (Højere handelseksamen)** — focus on business, economics, and international relations.
- **HTX (Højere teknisk eksamen)** — focus on science, technology, and engineering.
- **HF (Højere forberedelseksamen)** — shorter (2 years), more practical; good if you want to move on faster or didn't like school much.

👉 Choose one of these if you are interested in going to university or want to keep options open for higher education.

2 Erhvervsuddannelse (Vocational education and training, VET)

- Learn a trade (e.g. electrician, carpenter, chef, hairdresser, health worker).
- Combines school and paid apprenticeship.
- Can lead to skilled jobs or further studies (e.g. erhvervsakademi or professionshøjskole).

👉 Choose this if you enjoy practical work and want to enter the job market with a profession.

3 Kombinationsuddannelser (EUX)

- Combines vocational training with a studentereksamen level exam.
- Gives you both a trade qualification and access to higher education.

👉 Good if you want the best of both worlds — practical skills and the chance to go to university later.

✨ Questions to ask yourself

- ✓ Do I enjoy academic subjects (like languages, history, science)? → Gymnasium could be a good fit.
 - ✓ Am I passionate about practical, hands-on work? → A vocational path might suit you better.
 - ✓ Do I want to go to university one day? → Academic upper secondary or EUX are the strongest options.
 - ✓ Do I want to earn money while I study? → Vocational education often offers paid apprenticeships.
-

Special considerations

- Since you are fluent in Danish and have a multicultural background, you could consider paths where language skills and intercultural understanding are an advantage (e.g. international business, teaching, diplomacy).
 - Many schools offer guidance counselors (studievejleder). Booking a meeting can help you explore specific programs near you.
 - You could also consider schools with strong diversity and support networks.
-

My recommendation

Since you've just finished primary school, I recommend:

➔ **If you like school and want to keep doors open:** consider **STX**, **HHX**, or **HTX**, depending on whether you prefer general studies, business, or technology.

➔ **If you prefer practical work or know a trade you're passionate about:** consider a **vocational education** or **EUX**.

If you want, you can tell me:

- What subjects you enjoy most?
- What type of work you see yourself doing in the future?
- Whether you want to go to university one day?

Then I can give you an even more tailored recommendation! ✨
