

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Chad. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself — that helps me give you a thoughtful answer! Since you've just finished primary school in Denmark (which usually means **folkeskole** up to 9th or 10th grade), you're at an exciting point where several good options are open to you. I'll break them down to help you reflect:

🎓 Your main options after primary school in Denmark

1 Gymnasiale uddannelser (Upper secondary education / high school equivalents)

If you want to continue your general academic education (often leading to university), you can choose:

- **STX (Alment gymnasium)** — Focus on general academic subjects like languages, science, and humanities.
- **HHX (Handelsgymnasium)** — Focus on business, economics, and international trade.
- **HTX (Teknisk gymnasium)** — Focus on technology, science, IT, and technical subjects.
- **HF (Højere Forberedelseseksamen)** — A shorter 2-year general education for more mature students or those who want a different path to university.

💡 **Best if:** You enjoy school subjects, want to keep your options open for higher education (university or university colleges), or are interested in areas like science, languages, business, or technology.

2 Erhvervsuddannelser (Vocational education / apprenticeships)

If you're more interested in practical, hands-on work and want to learn a trade, you can choose:

- A vocational program (e.g., to become a carpenter, electrician, chef, hairdresser, IT supporter, social and health care worker, etc.)
- Often combines school time with an apprenticeship in a company (praktik).

💡 **Best if:** You want to work with your hands, like the idea of earning money while you learn, or already have a trade you're passionate about.

3 Kombineret ungdomsuddannelse (Combined youth education)

A special option if you feel unsure about the typical gymnasium or vocational programs, and want a more flexible or supportive start.

☀️ How to choose?

Ask yourself:

- Do I enjoy academic subjects and want to go to university later? → **STX / HHX / HTX / HF**
- Am I more motivated by practical work, and want to learn a trade? → **Erhvervsuddannelse**
- Do I want to combine both or am I unsure? → Consider **EUX** (a vocational program that also gives you a high school exam)

✨ Other things to consider

- **Your interests:** What subjects or activities do you enjoy most? Science, business, languages, technology, creative arts?
- **Your strengths:** Do you prefer practical tasks or theoretical studies?
- **Your long-term dreams:** Do you see yourself at university? Starting to work earlier? Being self-employed?

🤔 My recommendation for you

Since you're fluent in Danish, have a background that combines Danish and Chadian culture, and are still exploring, I suggest:

- ✓ **Visit open house events at local gymnasiums and vocational schools** — see where you feel most inspired.
- ✓ **Talk to a guidance counselor (UU-vejleder)** — they can help you map your options.
- ✓ **If you're unsure, STX or HF can be a safe choice** — they keep doors open while you explore your interests.

If you want, I can help you:

- 👉 Find specific schools or programs near where you live.
- 👉 Make a list of pros and cons for each option.
- 👉 Explore careers that match your interests.

Would you like that? And can you tell me what subjects or activities you enjoy most? 🚀
