

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Comoros. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish.

What educational path would you recommend for me?

That's a really thoughtful question — it's great that you're considering your future carefully! Since you've just finished primary school in Denmark (that means *folkeskolen*, typically around 9th or 10th grade), you have several good options depending on your interests, strengths, and future goals. Let's break it down:

🎓 Your options after primary school in Denmark

Here are the main educational paths:

1 Gymnasiale uddannelser (General upper secondary education)

These are for you if you think you want to go to university later, or if you enjoy academic subjects.

- **STX (Almen gymnasium)** – broad academic focus (languages, science, humanities, social science)
- **HHX (Handelsskolens gymnasium)** – focus on business, economics, marketing
- **HTX (Teknisk gymnasium)** – focus on technology, science, IT
- **HF (Højere Forberedelseseksamen)** – shorter (2 years), more practice-oriented, for those who want to move on to higher education but maybe don't want 3 years of gymnasium

👉 *Recommended if you like studying theory, want to keep doors open for university, or are unsure exactly what career you want yet.*

2 Erhvervsuddannelser (Vocational education and training, EUD)

These combine school with apprenticeships in a workplace — you learn a trade and earn a qualification for a specific job.

- Examples: electrician, carpenter, chef, hairdresser, mechanic, social care assistant, etc.
- Takes about 3-5 years depending on the trade.

👉 *Recommended if you like practical, hands-on learning, and want to start working earlier with good job prospects.*

3 Kombinerede forløb / EUX

- EUX combines vocational training (like EUD) with general upper secondary subjects so you can both get a trade *and* qualify for university.

👉 *Recommended if you like hands-on work but also want the option to study at university later.*

How to choose?

Consider these questions:

- ✓ What subjects do I enjoy most?
- ✓ Do I prefer theory (reading, writing, analysis) or practice (building, creating, doing)?
- ✓ Do I want to go to university, or start working earlier?
- ✓ What kind of environment do I want — classroom, workshop, or a mix?

Example paths based on common interests

- If you like science, math, or tech → HTX
- If you like business, languages, or social studies → STX or HHX
- If you like working with your hands, creating things → EUD or EUX
- If you want flexibility and aren't sure yet → STX or EUX

Final advice

 Since you are fluent in Danish and have completed your primary schooling, you have all the options available to you.

 You could visit *uddannelsesmesse* (education fairs) or *åbent hus* (open house days) at schools near you.

 Talk to a **studievejleder (guidance counselor)** — they can help you make a plan.

If you'd like, tell me more about:

- What subjects you like or don't like
- What kind of job you could see yourself doing
- Whether you prefer school or practical work

 That way I can give you more specific recommendations!
