

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Croatia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's great that you're thinking carefully about your next step — and congratulations on finishing primary school! Since you're 16 and in Denmark, you have several good options depending on your interests, strengths, and long-term goals. Let's break it down:

Common educational paths after primary school in Denmark

1 Gymnasium (STX)

- General upper secondary education
- Focus on academic subjects: humanities, science, social science
- Good if you want to go to university later
- Wide range of subjects; you can tailor with study lines (e.g., science-heavy, language-heavy)

2 HHX (Higher Commercial Examination Programme)

- Focus on business, economics, marketing
- Good if you're interested in commerce or want to study business at university or business colleges later

3 HTX (Higher Technical Examination Programme)

- Focus on technology, natural sciences, IT
- Ideal if you like STEM (science, technology, engineering, maths)

4 HF (Higher Preparatory Examination)

- Shorter (2 years instead of 3)
- Often more practical, good for students who want a less theoretical path
- Leads to higher education, but sometimes with fewer options

5 Vocational education and training (EUD/erhvervsuddannelse)

- Combines school with apprenticeship (praktik)
- Many fields: crafts, mechanics, carpentry, hairdressing, IT-support, gastronomy, healthcare, etc.

- You graduate with a professional qualification, can work right away, or continue to higher education
-

How to choose?

Ask yourself:

- ✓ Do I like academic subjects, or do I prefer practical, hands-on work?
 - ✓ Do I want to go to university later?
 - ✓ Do I have a specific interest already (e.g. business, science, IT, design)?
 - ✓ Do I want to work soon or study longer?
-

Some suggestions based on common interests

- **If you enjoy school and want to keep your options open:** STX is a safe and flexible choice.
 - **If you're interested in business or economics:** HHX.
 - **If you love science, IT, or technology:** HTX.
 - **If you want to learn a trade, start earning earlier, or prefer practical learning:** vocational education (EUD).
 - **If you're unsure, but don't want 3 years of gymnasium:** HF can be a good compromise.
-

Special consideration

Since you have Croatian roots and are fluent in Danish, you could also consider international study lines (e.g. IB - International Baccalaureate) if you're interested in studying or working abroad later.

 **If you tell me more about what subjects or activities you like (e.g. maths, languages, helping people, building things, computers), I can give a more personal recommendation!**

Would you like help exploring specific schools or programs near where you live?
