

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from North Korea. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a thoughtful and important question — and it's great that you're considering your next steps carefully! Let's break it down so I can give you useful advice tailored to your situation.

Education system in Denmark after primary school

Since you've completed **folkeskolen (primary and lower secondary school)**, your typical next options are:

Gymnasiale uddannelser (general upper secondary education)

These are 3-year programs preparing for university:

- **STX** (studentereksamen): broad academic program
- **HHX** (business-oriented)
- **HTX** (technology and science focused)
- **HF** (2-year program, often for older students or those who want a more flexible route)

Erhvervsuddannelser (vocational education and training - VET / EUD)

A combination of school + apprenticeship. You train for a specific job (e.g. electrician, chef, carpenter, healthcare assistant). This can also lead to further education later.

Kombinerede uddannelser / EUX

A mix of vocational training and general upper secondary education (gives you both a trade and the possibility to continue at university).

What to consider

Your interests

- Do you like academic subjects and want to go to university? → Consider STX, HHX, HTX, or HF.
- Do you enjoy working hands-on, learning by doing, or want to start earning earlier? → Consider EUD or EUX.

Your strengths

- Are you stronger in humanities, sciences, business, technology?
- Do you prefer practical tasks or theoretical study?

✓ Your goals

- Do you already know what kind of job you want?
- Are you curious about exploring more before choosing a career?

✓ Social environment

- Do you want a larger school setting, or something smaller and more personal?
- Do you like working independently, or in teams?

🚀 My recommendation

Since you're fluent in Danish and have both Danish and North Korean cultural background, you have a **unique strength** that could be valuable in many fields!

👉 If you enjoy school subjects and want to keep doors open for university later:

- **STX** – broad and flexible, good if you're unsure what to specialize in yet.
- **HTX** – if you're interested in science, technology, or engineering.
- **HHX** – if you're curious about business, economics, or international trade.

👉 If you're more interested in starting a career path or learning a trade:

- **EUD** – choose a specific vocational path.
- **EUX** – great if you want a trade but also want to keep the option of university.

🌟 Final tip

➡ **Talk to a guidance counselor (UU-vejleder)** at your school or municipality — they can help you map your interests to specific programs.

➡ **Visit open house days (åbent hus)** at different schools to get a feel for the atmosphere.

If you tell me more about your **interests, subjects you enjoy, or career dreams**, I can give an even more specific suggestion! Would you like that? 😊
