

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Denmark. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish.

What educational path would you recommend for me?

That's a great question, and it's wonderful that you're reflecting carefully on your next step! Since you're 16, just finished **folkeskolen (primary/lower secondary school)**, and are fluent in Danish, I can help you explore your options in the Danish education system. Let's break it down:

🎓 Your main options after 9th/10th grade in Denmark

1 Gymnasiale uddannelser (Upper secondary general education)

These prepare you for higher education (universities, university colleges, etc.).

- **STX (Almen studentereksamen)**
 - Broad academic programme (Danish, foreign languages, science, social studies, arts).
 - Good if you're unsure and want to keep many doors open.
- **HHX (Højere handelseksamen)**
 - Focus on business, economics, marketing.
 - Good if you're interested in commerce or international business.
- **HTX (Højere teknisk eksamen)**
 - Focus on technology, natural sciences, IT.
 - Good if you like science, engineering, or tech.
- **HF (Højere forberedelseksamen)**
 - 2-year general education, more practical, often for slightly older students.
 - Can be a flexible path to higher education.

2 Erhvervsuddannelser (Vocational education and training – VET)

- Combine school and apprenticeship.
- Learn a trade: e.g. carpenter, electrician, chef, hairdresser, healthcare assistant, IT-supporter.
- After VET you can work directly or continue in some higher education (e.g. erhvervsakademi).

3 Kombinationsforløb

- **EUX:** Mix of vocational training + gymnasial level exam. You get a vocational qualification and study subjects at gymnasial level → both job and higher education options.

How to decide?

Ask yourself:

- ✓ What subjects do I enjoy most?
- ✓ Do I want to go to university later, or would I prefer to work after a few years?
- ✓ Do I like practical learning, or more theoretical/academic?
- ✓ Do I want a broad education or focus on something (business, tech, crafts)?

My recommendations based on your info

Since:

- You are fluent in Danish (so no language barrier for any path),
- You've just finished primary school (typical age for gymnasium or VET),
- Your interests weren't specified yet,

 **If you enjoy academic subjects and want to keep many options open:**

STX is a safe and broad choice.

 **If you're interested in technology, science, or engineering:**

Consider HTX.

 **If you're business-minded or curious about marketing, economics:**

Check out HHX.

 **If you like to learn by doing and want a profession earlier:**

Explore VET or EUX programmes.

Next steps

- Talk to your school's guidance counselor (UU-vejleder).
- Visit open house events at local gymnasiums or vocational schools.
- Try short internships or "brobygning" to experience different paths.

 **If you tell me more about your interests (favorite subjects, hobbies, dreams), I can give more personalized advice!**

Would you like help exploring specific schools near where you live?
