

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Dominica. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

It's great that you're thinking carefully about your next steps! Since you just finished primary school (in Denmark that would be **9th or 10th grade**, depending on your path), you have several options ahead. Let's break it down so you can make a good decision.

Main educational paths after primary school in Denmark

Here are the most common choices:

✓ **Gymnasiale uddannelser (Upper secondary education – for academic studies)**

These programs prepare you for higher education (university or other advanced studies):

- **STX (Studentereksamen)** – broad academic education with focus on humanities, science and social studies.
- **HHX (Higher Commercial Examination)** – focus on business, economics and languages.
- **HTX (Higher Technical Examination)** – focus on technology, science, and innovation.
- **HF (Higher Preparatory Examination)** – shorter, more flexible, often used if you're unsure or want to start higher education sooner.

✓ **Erhvervsuddannelse (Vocational education and training – VET)**

If you want to **learn a trade** or profession and perhaps start working faster:

- Combines school and apprenticeship.
- Examples: electrician, carpenter, chef, hairdresser, IT supporter, healthcare assistant.

✓ **Kombinerede forløb (EUX)**

- Combine **vocational training with a general upper secondary level**.
- You get both a trade and qualifications to enter university.

How to decide what's best for you

Consider:

- **Interests:** Do you enjoy academic subjects, practical tasks, working with people, technology, business, or something else?
- **Learning style:** Do you prefer classroom learning or learning-by-doing?

- **Future plans:** Are you thinking of university, starting work earlier, or keeping doors open?
-

🌟 My recommendation (based on what you've shared)

Since:

- You're fluent in Danish and likely comfortable in the Danish school system.
- You have a multicultural background (this can be a strength in international business, languages, or social work).
- You're just finishing primary school and are still exploring your interests.

👉 **I would suggest you consider STX or HHX** if you like academic learning and want to keep your options open.

👉 **If you like hands-on work but want the option for further study later, look into EUX.**

Next steps

- 1 Visit **uddannelsesguiden.dk** (UG.dk) and take their guidance tests — they help match your interests to education types.
 - 2 Talk to your school counselor (vejleder) — they can help you arrange visits to schools.
 - 3 Try to visit some STX, HHX, HTX, or vocational schools during their open house events.
-

⚡ **Final tip:** At 16, it's normal not to know exactly what you want. Choose something that keeps several doors open — you can always adjust as you learn more about yourself!

If you tell me more about:

- 👉 What subjects you like
- 👉 What type of work you can see yourself doing
- 👉 Any hobbies or passions

... I can give you a more tailored recommendation! Want to share? 😊
