

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Equatorial Guinea. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

It's great that you're thinking ahead about your educational path! Since you've finished primary school (which in Denmark means you've completed *folkeskolen*, typically 9th or 10th grade), your next step depends on your interests, strengths, and future goals. Let me break it down for you:

Main educational options after primary school in Denmark

1 Gymnasiale uddannelser (Upper secondary education preparing for university)

These are good choices if you think you might want to go to university later. Types include:

- **STX (Almen studentereksamen)** — Broad and academic, includes humanities, science, and social science.
- **HHX (Højere handelseksamen)** — Focus on business, economics, and languages.
- **HTX (Højere teknisk eksamen)** — Focus on technology, science, and innovation.
- **HF (Højere forberedelseseksamen)** — Shorter (2 years), often for more mature students or those who want a practical academic path.

2 Erhvervsuddannelser (Vocational education and training)

If you're more interested in learning a trade or profession while working practically, this could suit you:

- You can train as e.g. electrician, carpenter, chef, healthcare assistant, IT supporter, etc.
- Combines school with apprenticeships in companies.

3 Kombinationsuddannelser / andre muligheder

- **EUX** — Combines vocational education with general upper secondary courses, so you can get both a trade and access to higher education.
- **International programs** — e.g. IB (International Baccalaureate) if you're interested in English-language study and international perspectives.

How to choose? Consider:

✓ **Your interests** — Do you like academic subjects (math, science, languages)? Or do you prefer hands-on/practical work?

✓ **Your learning style** — Do you thrive in classroom settings, or do you prefer learning by doing?

✅ **Your future dreams** — Do you want to go to university, start working sooner, or maybe even start your own business?

✅ **Your strengths** — Are there subjects where you excel or feel passionate?

🌟 Example paths

👉 *You enjoy science, technology, or engineering* → Consider **HTX** or **EUX with a technical focus**

👉 *You like business and economics* → **HHX** or **EUX business**

👉 *You want a broad academic education and may go to university* → **STX**

👉 *You want to work with your hands, learn a trade, and get into the job market earlier* →

Erhvervsuddannelse (e.g. as a carpenter, IT-supporter, healthcare worker)

👉 *You like practical + academic mix* → **EUX**

📌 My recommendation

Since you're fluent in Danish and you have a multicultural background, you could thrive in many areas.

💡 **If you're unsure:** STX or HF can give you a broad education and keep your options open.

💡 **If you want to start working earlier but keep doors open for higher education:** EUX is a fantastic option.

💡 **If you like hands-on work and want to get skilled in a trade:** An erhvervsuddannelse could be the right fit.

💬 **Next step:** I suggest you:

- Visit uddannelsesguiden.dk (UG.dk) to explore programs.
- Attend open house events (*åbent hus*) at local gymnasiums and vocational schools.
- Talk with your school counselor (*UU-vejleder*).

👉 If you tell me more about your interests (e.g. favorite subjects, hobbies, what you imagine yourself doing), I can give you a more personalized recommendation! 🚀
