

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Fiji. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's great that you're thinking carefully about your next step! Since you're 16, have finished primary school in Denmark (I assume you mean *folkeskole*, typically ending at 9th or 10th grade), and are fluent in Danish, you have several solid options depending on your interests, strengths, and future plans. Let's break it down:

Common educational paths after folkeskole in Denmark

1 Gymnasiale uddannelser (Upper secondary education – academic)

These prepare you for higher education (university, university colleges):

- **STX (Alment gymnasium)** – general academic program, broad range of subjects.
- **HHX (Handelsgymnasium)** – focus on business, economics, marketing.
- **HTX (Teknisk gymnasium)** – focus on technology, natural sciences.
- **HF (Højere Forberedelseseksamen)** – 2-year program, good if you want a shorter academic path or didn't enjoy folkeskole so much.

 Choose this path if you enjoy schoolwork, want to keep many doors open, and might want to study at university later.

2 Erhvervsuddannelser (Vocational education and training - EUD)

- Learn a trade (e.g. electrician, carpenter, hairdresser, chef, social and health care assistant).
- Mix of school + apprenticeship in a company.
- Leads to skilled work; can later go on to further studies (e.g. *Erhvervsakademi*).

 Choose this if you prefer practical learning and want to get into the job market faster with a skill.

3 Kombinerede eller alternative veje

- **EUX** – combines vocational training with gymnasium-level academic subjects → gives you both a trade and the option for higher education.
- **International or IB (International Baccalaureate)** – if you're interested in international studies and English-language instruction.

How to decide?

Here are a few questions to ask yourself:

- Do you enjoy academic subjects (math, history, languages, science)?
 - Do you prefer practical, hands-on tasks?
 - Are you thinking of university later on? Or would you rather start working sooner?
 - Are there particular careers that interest you?
-

My suggestion

Since you have a multicultural background and are fluent in Danish, you could thrive in:

- ✓ **STX** – gives a broad foundation, keeps options open.
- ✓ **HHX** – especially if you're curious about business, trade, or entrepreneurship (could be useful if you ever want to connect Denmark-Fiji opportunities).
- ✓ **EUX** – if you like the idea of both practical skills and higher education possibilities.

If you tell me more about:

- What subjects or activities you enjoy most
- Whether you like school-style learning or more practical tasks
- If you have ideas about a future career

... I can help you narrow it down even further! 😊

Would you like me to list specific schools or programs near where you live in Denmark?
