

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from France. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great and important question — it's fantastic that you're thinking carefully about your future! Let's break it down based on your background, situation, and options in Denmark:

Education options after primary school (folkeskole) in Denmark

Since you've completed primary school, you generally have these main paths:

1 Gymnasial uddannelse (General upper secondary education)

- **STX (studentereksamen)** – broad academic program (humanities, sciences, social sciences)
- **HHX (higher commercial exam)** – focus on business, economics, languages
- **HTX (higher technical exam)** – focus on technology, science, engineering
- **HF (higher preparatory exam)** – shorter (2 years), more practical, often for adults but possible for younger students

2 Erhvervsuddannelse (vocational education & training - VET)

- Combines school + apprenticeship in a company
- Prepares you directly for a trade (e.g. carpenter, chef, hairdresser, mechanic)

3 International or bilingual options

- International Baccalaureate (IB) — good if you think you might study abroad
- French-Danish bilingual programs (might exist locally, depending where in DK you are)

What could suit you?

- ✓ Since you're fluent in Danish and born/raised in Denmark, all these options are open to you.
- ✓ Your French heritage could be an advantage if you like languages or see yourself working internationally.
- ✓ Think about:

- Do you enjoy academic subjects (math, languages, science)? → STX or IB
- Do you love technology and practical science? → HTX
- Are you interested in business or economics? → HHX

- Do you want to learn a trade and get into work life sooner? → VET
- Do you want to keep doors open for France or other countries? → IB or STX (with strong language focus)

Given your French background

- You might consider STX or IB if you want flexibility to study in Denmark or France later
- You could choose STX with French and English at a high level
- Or look into IB schools — they are recognized internationally

My general advice

👉 **If you're not sure yet:** STX is the most flexible and broad, keeping many options open for university, both in Denmark and abroad.

👉 **If you are drawn to specific subjects (e.g. business, tech):** HHX or HTX can be great.

👉 **If you're eager to start working with your hands and earn money sooner:** consider VET.

👉 **If you think about studying in France or another country later:** look into IB or STX with strong language profile.

If you tell me more about:

- Your favorite subjects
- Whether you see yourself going to university
- Whether you want to work in Denmark, France, or elsewhere

... I can give you an even more tailored recommendation!

Would you like that? 😊
