

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Haiti. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a big step—congratulations on finishing primary school! You're in a good position to explore different educational options in Denmark, and the fact that you speak Danish fluently and have a multicultural background can be a real strength.

Here are a few paths you might consider, depending on your interests, skills, and goals:

♦ 1. Gymnasium (STX, HHX, HTX) – If you're aiming for university later

These are 3-year general upper secondary education programs that prepare you for higher education.

- **STX (Almen studentereksamen):** Broad academic focus—ideal if you like subjects like Danish, English, social studies, and natural sciences.
- **HHX (Handelsskolen):** Focus on business, economics, and international trade—great if you're interested in business or working in companies.
- **HTX (Teknisk gymnasium):** Focus on science and technology—perfect if you enjoy math, IT, or engineering.

Recommended if: You enjoy schoolwork, want a university degree, and like a more academic environment.

♦ 2. EUD (Erhvervsuddannelse / Vocational Education) – If you prefer hands-on learning

This path prepares you for specific trades and jobs, like:

- Electrician
- Carpenter
- Mechanic
- Hairdresser
- Chef
- Healthcare assistant (social og sundhedsassistent)

You'll combine school with practical work experience (praktikplads).

Recommended if: You like practical, real-world work and want to start earning faster.

♦ 3. EUX – A combination of vocational and academic

EUX is like EUD but with more academic subjects. You get both a vocational education and the right to apply to higher education.

Recommended if: You want to keep your options open—work in a trade **and** have the chance to study at a university later.

♦ 4. 10th Grade (10. klasse) – If you're unsure and want more time

If you're not sure what to choose, you can spend a year in 10th grade to mature, explore interests, and prepare better for the next step. Some schools offer special programs focusing on music, sports, travel, or entrepreneurship.

Recommended if: You're unsure and want time to explore your options with less pressure.

Tips for Choosing Your Path:

- **Think about what you're good at and what you enjoy** – Are you into books, people, machines, or creative work?
 - **Talk to a guidance counselor (UU-vejleder)** – They can help you look at your options more closely.
 - **Visit open houses ("Åbent hus")** at schools – It helps a lot to see the place and talk to students.
-

If you tell me more about your interests—like whether you like working with your hands, helping people, learning languages, business, or technology—I can give a more personalized suggestion.
