

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Honduras. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Since you're 16, just finished primary school in Denmark (likely *folkeskole* up to 9th or 10th grade), and are considering your next step, there are a few common and well-supported paths in the Danish education system. The best one for you depends on your interests, strengths, and long-term goals.

Here are the main options:

1. Gymnasiale uddannelser (Upper Secondary Education)

If you're interested in further academic studies or possibly going to university later, one of these is a good choice:

♦ STX – *Alment gymnasium*

Focus: Broad academic education (humanities, social sciences, natural sciences)

Good for: University preparation

♦ HTX – *Teknisk gymnasium*

Focus: Technology, science, engineering

Good for: Tech careers or studying engineering/sciences later

♦ HHX – *Handelsgymnasium*

Focus: Business, economics, marketing

Good for: Business careers or studying economics/business

♦ HF – *Højere forberedelseksamen*

Focus: Shorter, 2-year general education (often more practical or for adults, but open to young people too)

Good for: People who want a more flexible or shorter route to higher education

2. Erhvervsuddannelser (Vocational Education and Training / EUD)

If you prefer a more hands-on approach and want to start working earlier, vocational training might suit you:

- Combine school with apprenticeship

- Professions like electrician, carpenter, mechanic, hairdresser, social and health assistant (SOSU), chef, etc.
- You can later continue into *EUX* (see below) or even higher education

♦ **EUX – Vocational + Academic**

Gives you a skilled trade *and* a high school diploma.

Good if you want practical training + the option to go to university.

Things to Consider

Ask yourself:

- Do I like studying and reading, or prefer doing practical, hands-on tasks?
- Do I see myself going to university in the future?
- Do I have a specific job or dream in mind (e.g., doctor, engineer, entrepreneur, artist, chef)?

My Recommendation (based on what you've said so far)

Since you just finished primary school, are fluent in Danish, and don't mention strong preferences yet, a general academic path like **STX** could give you a solid base while keeping all options open. It also gives you time to explore your interests more deeply.

However, if you're curious about technical fields or business, **HTX** or **HHX** could be smart choices too.

If you're more hands-on and like the idea of starting work earlier or learning a trade, **EUD** or **EUX** are excellent, respected options in Denmark with good job prospects and flexibility.

Flexibility

Remember: No choice is final. The Danish system allows you to switch or take supplementary courses later. You're not locked in!

If you'd like, I can help you compare specific schools or programs in your area, or suggest a path based on what you enjoy (e.g., favorite subjects, hobbies, dream jobs). Just let me know!
