

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Hungary. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing your background — that's really helpful. Since you've just finished primary school in Denmark (9th or 10th grade), you're now facing one of the biggest education decisions young people make in Denmark. Here's a breakdown of your main options, along with some guidance based on different interests and goals:

Your Main Education Options After Primary School

1. Gymnasiale Uddannelser (Upper Secondary Education)

These are academic programs that typically last 3 years and prepare you for university.

a. STX (Studentereksamen)

- **Focus:** General education (sciences, humanities, social sciences).
- **Best for:** Students who want to keep their options open and maybe go to university.
- **Pros:** Broad education, good social environment.
- **Consider if:** You enjoy school and academic subjects.

b. HHX (Higher Commercial Examination Programme)

- **Focus:** Business, economics, marketing, international trade.
- **Best for:** Future businesspeople, entrepreneurs, or those interested in economics.
- **Consider if:** You're interested in finance, trade, or working in companies.

c. HTX (Higher Technical Examination Programme)

- **Focus:** Science, technology, engineering, IT.
- **Best for:** People who like technology, innovation, or science.
- **Consider if:** You enjoy math, physics, programming, or biology.

d. HF (Higher Preparatory Examination)

- **Focus:** General education, but shorter (2 years).
- **Best for:** Students who want a more practical and fast track to further education.
- **Consider if:** You prefer a more mature and flexible learning environment.

2. EUD / EUX (Vocational Education and Training)

These are practical programs that combine school with real work (apprenticeship) in a company.

a. EUD (Erhvervsuddannelse)

- **Focus:** Becoming a skilled worker (e.g. carpenter, electrician, hairdresser, chef, mechanic).
- **Best for:** Hands-on learners who want to start working earlier.
- **Pros:** You earn money during apprenticeship, and you finish faster than gymnasiale paths.

b. EUX

- **A mix of EUD and gymnasial education.**
- **Best for:** Students who want a job but also want the option of university later.
- **Consider if:** You want both a craft and the academic option.

What to Ask Yourself Before Choosing

- **Do I enjoy academic school subjects (e.g. math, languages, science)?**
→ Consider **STX**, **HTX**, or **HHX**.
- **Do I prefer learning by doing and want to work sooner?**
→ Consider **EUD** or **EUX**.
- **Do I want to keep my options open for university?**
→ Any **gymnasial** education or **EUX**.
- **Do I have a specific dream or passion (e.g., design, technology, business)?**
→ Let's talk about that — it can guide you.

Special Note as a Danish-Hungarian Student

Since you're fluent in Danish and have a multicultural background:

- You could be well-suited for **international business** (HHX) or **languages and culture** (STX).
- If you speak Hungarian well too, you could build a future career in international relations, translation, or working in European institutions (since Hungary and Denmark are both EU members).

My Suggestion (Based on What You've Shared)

If you're still exploring your interests and enjoy academic subjects, **STX** is the most flexible and keeps almost every door open.

If you're curious about business or finance, **HHX** could be perfect — especially if you're also interested in international topics.

If you're more technical and like science or tech, **HTX** is a great path.

But if you want to work with your hands, or have a dream of a specific trade, **EUD** or **EUX** will get you there faster and practically.

If you'd like, I can help you compare specific schools or make a more personalized suggestion based on your interests. Want to tell me more about what subjects you liked in school or what kind of future sounds exciting to you?
