

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Jamaica. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing your background—it's great that you're thinking carefully about your next step. Since you've just finished primary school in Denmark and are 16, you're likely transitioning into **ungdomsuddannelse** (upper secondary education), which is the stage after **folkeskole**.

In Denmark, your main educational options at this point are:

◆ Gymnasiale uddannelser (Academic Upper Secondary Education)

These programs prepare you for university. Ideal if you're interested in academic subjects like science, languages, history, or economics.

Options:

- **STX (Studentereksamen):** Broad, academic focus.
- **HHX (Higher Commercial Examination):** Business, economics, and marketing.
- **HTX (Higher Technical Examination):** Focuses on technology and science.
- **HF (Higher Preparatory Examination):** Shorter (2 years), more flexible, good if you want a faster route to higher education.

Good if you want to go to university later or aren't sure yet.

◆ Erhvervsuddannelser (Vocational Education and Training – VET)

These are practical programs that combine school and apprenticeship. You learn a trade like:

- Electrician
- Carpenter
- Hairdresser
- Mechanic
- Social and health care assistant (SOSU)

Good if you want to start working sooner or prefer hands-on learning.

◆ **Kombinerede forløb / EUX**

This is a mix of both – you get a vocational education **plus** the ability to apply to university later.

- Great if you're practical but still want to keep academic doors open.
 - Popular with students who are motivated and want options.
-

How to Choose?

Here are some questions to ask yourself:

- Do you enjoy studying subjects like math, science, or history?
 - Do you prefer working with your hands or learning by doing?
 - Do you want to go to university later?
 - Are you more interested in working with people, with technology, or in creative fields?
 - Would you like to start earning money earlier?
-

Tips Based on Your Background

Since you're bilingual (Danish and likely English through your Jamaican heritage), you might thrive in international fields like:

- **International Business (HHX)**
 - **Technology and Design (HTX)**
 - **Healthcare or Social Work (SOSU)** if you're drawn to helping people
 - **Creative fields** (e.g., graphic design, media) – often available through vocational tracks or electives in gymnasiums
-

Recommendation:

If you're academically inclined and thinking about university later:

→ **STX or HHX** would be strong choices.

If you want to do something practical and get into work earlier, but still keep future study options open:

→ **EUX** is a fantastic path.

If you want hands-on work soon:

→ A direct **VET program** may be the best fit.

Would you like help picking a specific school or program in your area in Denmark? I can help with that too.
