

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Kyrgyzstan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing a bit about yourself — that's helpful. Since you're 16 and just finished **primary school** in Denmark, you're at an important crossroads where you can choose a path that suits your strengths, interests, and long-term goals.

In Denmark, after **Folkeskole (primary/lower secondary school)**, you typically choose between **three main educational paths** depending on whether you want to:

1. **Prepare for university**
2. **Learn a skilled trade or practical profession**
3. **Combine both in some way**

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are for students who want to continue to **university** later. You choose one of the following:

- **STX** – Studentereksamen (general academic, broad subjects)
- **HHX** – Higher Commercial Examination Programme (business/economics focus)
- **HTX** – Higher Technical Examination Programme (technology/natural science focus)
- **HF** – Higher Preparatory Examination (shorter, 2 years, more practical/for adults or later starters)

✓ Good if you:

- Like academic subjects
- Are considering university
- Are unsure and want to keep options open

2. Erhvervsuddannelser (EUD) – Vocational Education and Training

These are for people who want to **work as skilled professionals** (e.g. electrician, hairdresser, mechanic, chef, social care assistant, etc.). You start with basic courses and then move into a combination of school + work experience.

✓ Good if you:

- Prefer hands-on, practical learning
- Want to start earning earlier
- Are interested in a specific trade

💡 Bonus: You can sometimes continue to higher education after EUD, like through **EUX** (see below).

⚙️ 3. EUX – Combined Vocational + Academic Path

This is a mix of both: you become qualified in a trade but also get a study qualification similar to gymnasiet.

✅ Good if you:

- Want a profession but still want the option to go to university later
- Like both practical and academic work
- Are ready for a demanding program

What should you consider?

Here are a few personal questions to help decide:

- What subjects do you enjoy most?
- Do you like working with your hands or solving real-world problems?
- Are you more comfortable in a classroom or doing things practically?
- Do you have any career dreams or role models?
- Would you like to go to university eventually, or work sooner?

Example Paths

Here are some real-life examples based on different goals:

Interest	Recommended Path
Wants to be a doctor, lawyer, psychologist	STX or HF
Loves technology or engineering	HTX or EUX (technical)
Interested in starting a business	HHX
Wants to be a carpenter or chef	EUD
Not sure, but wants to keep many doors open	STX or EUX

Your background:

Since you're fluent in Danish, born and raised here, and understand both Danish and Kyrgyz culture, you might also consider paths where **language, communication, or multicultural understanding** is an asset – such as social work, healthcare, translation, or international business.

Would you like help figuring this out based on your interests, hobbies, or what kind of job you imagine having one day? I can help guide you further.
