

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Lao People's Democratic Republic. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

That's a great place to start — and thank you for sharing some background. Since you're 16, just finished primary school (in Danish context, *folkeskole*), and are fluent in Danish, you're now at a key decision point in the Danish education system. Let's go through your main options, and I'll also give you tailored recommendations based on a few possible directions you might want to go in life.

🎓 Main Educational Paths After Folkeskole in Denmark

1. Gymnasiale uddannelser (General Upper Secondary Education)

Duration: 3 years

Prepares you for university

- **STX** (*Alment Gymnasium*): Broad academic education (good for humanities, science, social sciences)
- **HTX** (*Teknisk Gymnasium*): Focus on science and technology
- **HHX** (*Handelsgymnasium*): Focus on business, economics, and marketing
- **HF** (*Højere Forberedelseseksamen*): 2-year general education, more practical and flexible

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

Duration: 2-5 years (depending on specialization)

Leads to skilled work, or can continue into higher education

- For becoming, e.g., electrician, hairdresser, mechanic, carpenter, or chef
- Combines school and apprenticeship (praktik)

3. Kombinerede forløb (EUX)

A mix of vocational training and academic upper secondary

Duration: 4-5 years

Gives both a trade qualification **and** access to university

📌 Recommendations Based on Your Situation

Here are some questions to help guide your choice:

- **Do you enjoy academic subjects and want to go to university?**

→ Consider **STX**, **HTX**, or **HHX**.

- **STX**: Great if you're not sure yet – keeps all doors open.
- **HTX**: Perfect if you like tech, science, or design.
- **HHX**: Ideal if you're into business, marketing, or finance.

- **Do you like working with your hands, being active, or starting work sooner?**
→ Look into **EUD** or **EUX**.
 - *EUD*: Good for skilled trades and getting a job quickly.
 - *EUX*: A very strong path if you want practical skills but also keep the option of higher education.
- **Do you want flexibility or had challenges in school before?**
→ **HF** can be a fresh start – 2 years, less pressure, often used by students who take a gap year first.

Personal Tips

- **Explore your interests early:** Try job shadowing (*brobygning*), or career guidance at your school or local UU-vejledning.
- **Think long-term:** Even if you want to work after school, keeping your academic options open with STX or EUX can give you more flexibility later.
- **Talk to others:** Ask older students, teachers, or people working in jobs you admire what path they took.

If you tell me more about:

- What subjects you enjoy
- What kind of job or lifestyle you imagine
- If you're more theoretical or practical

...I can give you a much more detailed and personal recommendation.

Would you like to do that?
