

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Madagascar. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

That's a great place to be—congratulations on finishing primary school! Since you're 16 and living in Denmark, you now have several options for what to do next, depending on your interests, goals, and whether you're more into academic or practical learning. Here's a breakdown of the main educational paths you can take:

1. Gymnasium (General Upper Secondary Education)

If you're academically strong and thinking about going to university one day, this is a great option.

Types of gymnasium:

- **STX (Almen studentereksamen)** – General academic focus: good for university.
- **HHX (Higher Commercial Examination)** – Focus on business, economics, and languages.
- **HTX (Higher Technical Examination)** – Focus on science, technology, and innovation.
- **HF (Higher Preparatory Examination)** – A bit shorter (2 years), good if you want a more flexible path to higher education.

Recommended if:

- You enjoy school subjects and want to keep your options open for university.
- You're interested in things like science, humanities, economics, or tech.

2. EUD (Vocational Education and Training)

You learn a trade and get real work experience early—great if you like hands-on learning.

Examples:

- Electrician
- Carpenter
- Hairdresser
- Mechanic
- Health care assistant

Usually includes time in school + apprenticeships with companies.

Recommended if:

- You want to work sooner and prefer practical learning.

- You have a clear idea of a profession you're interested in.

3. EUX (Combination of Vocational and Academic Education)

The best of both worlds—you get a vocational education *and* a studentereksamen, so you can also go to university later.

Recommended if:

- You want practical job skills *and* want to keep the door open for university.

Other factors to think about:

- **What are you good at?** (Subjects, skills, talents)
- **What do you enjoy doing?** (Working with people, using your hands, solving problems?)
- **What are your long-term dreams?** (Job, lifestyle, etc.)
- **Would you like to study abroad one day?** (Then a more academic path could help.)

A possible decision path for you:

1. **If you're unsure:** Consider starting with a **STX or HF**, because it gives you more flexibility and time to decide later.
2. **If you love working with your hands or a specific job interests you:** Look at **EUD or EUX**.
3. **If you're ambitious and want both options open:** EUX is a strong and demanding but rewarding choice.

Would you like to tell me more about your interests? For example:

- Do you enjoy math, science, languages, social studies?
- Do you prefer classroom learning or hands-on work?
- Are you already thinking about a future job or career?

That would help me give you a more personalized recommendation.
