

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Maldives. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing your background! Since you're 16, finished primary school in Denmark, and are fluent in Danish, you're at a key point where you can choose between several educational paths depending on your interests, strengths, and future goals.

Here's a breakdown of your main options in Denmark after primary school (folkeskole):

🎓 1. Gymnasiale uddannelser (Upper Secondary Education)

These are more academic and prepare you for university. They usually take 3 years.

a) STX (Almen studentereksamen)

- Broad and academic.
- Good if you're interested in subjects like science, history, languages, or social studies.
- Most flexible choice for university options.

b) HHX (Højere handelseksamen)

- Focus on business, economics, and marketing.
- Great if you're interested in the business world, finance, or entrepreneurship.

c) HTX (Højere teknisk eksamen)

- Focuses on science, technology, IT, and engineering.
- Ideal if you enjoy math, technology, or want a career in tech or engineering.

d) HF (Højere forberedelseksamen)

- A 2-year program.
- More practical and flexible, often for those who prefer a faster route to further education or aren't sure about a long academic path.

🔧 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

- If you prefer **practical learning** and want to enter the job market faster.
- You work as an apprentice and go to school part-time.
- Leads to skilled jobs like mechanic, electrician, chef, hairdresser, carpenter, etc.

- Also allows further education through **EUX** (see below).

EUX (Vocational + Academic)

- A mix of vocational training and gymnasial-level classes.
 - You can both **work as a skilled tradesperson** and **qualify for university**.
 - Great for students who are both practical and ambitious.
-

How to Choose? Consider:

- **Do you prefer theoretical/academic subjects or practical/hands-on work?**
 - **What are your strengths?** (Math, language, science, people skills?)
 - **Do you already have a dream job or field in mind?**
 - **Do you want to go to university later or start working earlier?**
-

Advice Specific to You:

Since you're fluent in Danish and have completed primary school in Denmark, you're well-prepared to choose any path.

Given your Maldivian heritage, you might also consider using your multicultural background as a strength—for example, in **international business, tourism, diplomacy, or language-based careers**.

What I Suggest:

If you're unsure and want to keep as many doors open as possible:

- **STX** – gives you broad academic skills and lets you decide later.
 - Or **EUX** – if you like the idea of working with your hands but also want academic options.
-

If you'd like, I can help you explore career ideas based on your interests and strengths. Just tell me more about:

- What subjects or activities you enjoy
- If you have any career dreams already
- If you want to go to university or not

Let me know!
