

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Marshall Islands. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing your background—it's great that you're thinking carefully about your next step. Since you're 16, living in Denmark, and just finished primary school, you're now at the stage where Danish students typically choose between several **youth education programs** (ungdomsuddannelser). The right path depends on your interests, strengths, and long-term goals. Here are your main options:

♦ 1. Gymnasiale uddannelser (General Upper Secondary Education)

These programs prepare you for higher education (university or professional degrees). There are four main types:

- **STX (Studentereksamen)** – Broad academic focus with subjects in science, humanities, and social studies.
- **HHX (Højere Handelseksamen)** – Focus on business, economics, and marketing.
- **HTX (Højere Teknisk Eksamen)** – Focus on technology, natural sciences, and IT.
- **HF (Højere Forberedelseseksamen)** – Shorter (2 years), more flexible, good for those who prefer a more practical approach to academics.

✓ Best for you if:

You enjoy academic subjects, want to keep your options open, and think you might want to attend university later.

♦ 2. Erhvervsuddannelser (Vocational Education and Training, EUD)

A mix of school and paid internships (praktik) in a trade or profession, typically lasting 3–5 years.

Examples of careers:

- Carpenter, electrician, chef, mechanic
- Health care worker, child care assistant
- Office administration or IT technician

✓ Best for you if:

You prefer hands-on learning, want to enter the workforce more quickly, or are interested in a specific trade.

♦ 3. Kombinationsuddannelser (EUX)

A mix of vocational training **and** academic subjects. It allows you to become skilled in a trade while also qualifying for university.

✓ **Best for you if:**

You want to learn a profession but also want to keep the option of university open.

📌 **What to consider:**

- **What are your interests and strengths?**
 - Do you like working with your hands, or do you prefer studying books and theory?
 - Do you enjoy working with people, tech, or creative tasks?
 - **Do you have any career dreams already?**
 - **Would you like to go to university later, or start working earlier?**
-

🔧 **Practical advice:**

- Visit **ungdommens uddannelsesvejledning (UU-vejleder)** in your kommune for personalized help.
 - Check out **ug.dk** – the Danish official education guidance site.
 - Consider attending **open house events (Åbent Hus)** at local schools to get a feel for the programs.
-

If you'd like, tell me a bit more about your **interests, strengths, or career ideas**, and I can help recommend a more specific direction.
