

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Mauritius. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing your background—you're at an exciting point in your life with many opportunities ahead. In Denmark, finishing primary school (folkeskolen) at around 16 means you're ready to consider your **youth education options (ungdomsuddannelser)**. Here's a breakdown of the main paths, along with some tailored advice based on your situation:

🎓 1. Gymnasiale uddannelser (Upper Secondary Education)

These are academic programs that prepare you for university or higher education.

Options:

- **STX (Almen studentereksamen):** Broad academic focus (sciences, humanities, social studies).
- **HHX (Højere handelseksamen):** Business, economics, and international trade.
- **HTX (Højere teknisk eksamen):** Technology, science, and innovation.
- **HF (Højere forberedelseksamen):** A 2-year program, often for students who want a shorter academic route or to apply to professions like nursing or teaching.

Recommended if:

- You enjoy theoretical learning.
- You're considering university later.
- You want flexibility and more time to choose your future career.

🔧 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

Practical, job-oriented programs leading to a skilled profession.

Examples:

- Electrician, carpenter, hairdresser, chef, IT technician, social worker, etc.

Recommended if:

- You prefer hands-on learning.
- You want to enter the job market sooner.
- You're interested in specific trades or practical skills.

3. EUX – A combination of vocational training and a studentereksamen

You get both a vocational qualification **and** a study-competence certificate, meaning you can work or go to university.

Recommended if:

- You like both practical and academic work.
- You want to keep your options open for university or work.

Some personal factors to consider:

 **You're fluent in Danish – great! That gives you access to all education types without extra language barriers.**

 **You have multicultural roots – this could be a huge advantage in global careers like:**

- International business (consider **HHX**)
- Tourism, languages, or diplomacy (consider **STX** with language/social science focus)
- Tech or engineering fields (consider **HTX** or **EUX tech**)

What should you do next?

1. **Talk to a study and career adviser (Studievejleder)** at your current school or the local *UU-vejledning*. They'll help guide you based on your grades, interests, and goals.
2. **Visit some schools (gymnasier or erhvervsskoler)** – open houses or trial days are common.
3. **Try online guidance tools** like ug.dk – Denmark's official education guide.

Final advice:

If you're unsure, **STX** or **HHX** are great places to start – they keep many doors open. If you're eager to work with your hands or want a quicker path to employment, look into **EUD** or **EUX**.

Would you like me to help you explore a few specific programs based on your interests (e.g., business, science, technology, arts)?
