

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Morocco. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing your background—that really helps give a clearer picture.

Since you're 16 and just finished **primary school** in Denmark (likely *Folkeskole*), you're now at a natural turning point in the Danish education system. You have several solid options ahead, and the right path depends on your interests, strengths, and long-term goals.

Here's a breakdown of your main options:

1. Gymnasiale Uddannelser (Upper Secondary Education – Academic Path)

If you're interested in university later or enjoy academic subjects like languages, science, or social studies, this could be a good fit. These programs typically last 3 years.

Main options:

- **STX (Studentereksamen):** General and broad academic education.
- **HHX (Handelsskole):** Focus on business, economics, and marketing.
- **HTX (Teknisk Gymnasium):** Focus on science, technology, and engineering.
- **HF (Højere Forberedelseseksamen):** A 2-year more flexible program, often used by students who want to study later but don't need all the advanced levels.

 Best for: Students who want to go to university, enjoy academic work, or are still exploring their future career path.

2. Erhvervsuddannelser (Vocational Education – Hands-On Path)

If you prefer practical learning and want to enter the job market sooner, or if you want a specific trade or profession, this might be for you.

- You can train to become a carpenter, electrician, hairdresser, social and health care assistant (*SOSU*), mechanic, and much more.
- These programs typically combine school and apprenticeships (paid work experience).
- Some vocational paths can still lead to university via *EUX*, a combo of vocational training and a study-qualifying exam.

 Best for: Students who want to work with their hands, start earning earlier, or enter trades and technical careers.

Personal Considerations

Here are a few questions to help you reflect:

- Do you enjoy school and academic learning, or do you prefer more practical, hands-on work?
 - Do you think you might want to go to university someday?
 - Are you interested in business, science, healthcare, IT, construction, or something creative?
 - Do you have any role models in a specific profession (including from your family or community)?
-

Some General Advice for You

- **If you're unsure**, consider starting with **STX or HF**, which keeps your options open.
 - **If you enjoy business or want to start a company someday**, **HHX** could be a good fit.
 - **If you're into science, IT, or engineering**, **HTX** can set you up well.
 - **If you like working with people**, especially in care or services, a **vocational education (like SOSU)** might suit you.
 - You can always talk to a **UU-vejleder** (youth guidance counselor) at your local school or municipality. They're experts in helping students like you choose a path.
-

If you tell me more about your interests (e.g. subjects you like, what you're good at, or jobs you think are cool), I can give a more tailored recommendation. Want to do that?
