

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Myanmar. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing that — and congratulations on finishing primary school! That's a big step, and now you're at a great moment to start thinking about your future path. Since you're 16 and have completed primary school in Denmark, here are the most common educational paths you can consider:

1. Gymnasium (STX, HHX, HTX) – If you're aiming for university

These are general upper secondary education programs that prepare you for higher education (university, business school, or technical university). Here are your options:

- **STX (Almen studentereksamen):** Focus on a broad general education (humanities, social sciences, natural sciences).
- **HHX (Højere handelseksamen):** Focus on business, economics, and international trade.
- **HTX (Højere teknisk eksamen):** Focus on science, technology, and IT.

Choose this if:

- You enjoy academic subjects.
- You think you might want to go to university.
- You want a strong foundation for many types of careers (medicine, law, engineering, business, etc.).

2. EUD (Erhvervsuddannelse) – If you want to learn a trade or profession

This is vocational education that combines school and apprenticeship (praktik). You learn hands-on skills while working in the real world.

Examples:

- Electrician
- Carpenter
- Hairdresser
- IT-supporter
- Chef
- Mechanic
- Health care assistant (sosu)

Choose this if:

- You prefer practical work over academic subjects.
- You want to start earning earlier.
- You're interested in skilled trades or service professions.

You can also start with **EUX**, which mixes vocational training with academic courses — this lets you both get a skilled trade **and** have the option to go to university later.

3. FGU (Forberedende Grunduddannelse) – If you're unsure or need more time

This is a preparatory program for young people under 25 who:

- Didn't complete 9th/10th grade with passing marks
- Need more time to mature or find direction
- Want help preparing for EUD, gymnasium, or a job

Choose this if:

- You're not ready to choose a clear path yet.
- You want to improve your skills in a supportive environment.

Some Questions to Ask Yourself:

- Do you enjoy studying, or do you prefer hands-on work?
- Do you see yourself going to university someday?
- What subjects or activities do you enjoy most?
- Would you rather work in an office, a hospital, a workshop, or something else?

My Suggestion (Based on What You Shared)

Since you're fluent in Danish, have completed primary school, and are living in Denmark with multicultural roots, you likely have many options. If you enjoy academic learning and are open to future university studies, **Gymnasium (STX or HHX)** could be a great start. If you're more interested in working with your hands or want to learn a practical skill quickly, then **EUD or EUX** is a strong and respected path too.

Would you like help figuring out what suits your interests and strengths best? I can help you explore specific programs or schools in your area too.
