

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Nepal. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Since you've just finished primary school in Denmark and are considering your next steps, it's great that you're thinking ahead. In Denmark, after primary school (**folkeskolen**), you typically have a few main educational paths to choose from. Here's a breakdown to help you decide:

🎓 1. Gymnasiale uddannelser (General Upper Secondary Education)

These programs are good if you're considering going to university later.

A) STX (Studentereksamen)

- Focus: Broad academic education (science, social studies, languages, etc.)
- Best if: You enjoy a variety of subjects and want to keep your options open.

B) HHX (Higher Commercial Examination Programme)

- Focus: Business, economics, and international trade.
- Best if: You're interested in business, marketing, or entrepreneurship.

C) HTX (Higher Technical Examination Programme)

- Focus: Science, technology, and innovation.
- Best if: You enjoy science, math, or want to work in tech or engineering fields.

D) HF (Higher Preparatory Examination Programme)

- Focus: Shorter and more focused, usually 2 years.
- Best if: You want a shorter route and might go to university college or certain university programs later.

🔧 2. Erhvervsuddannelser (Vocational Education and Training - VET)

- Focus: Combines school with apprenticeship/training in a real job.
- Best if: You want practical skills and to start working earlier (e.g., electrician, chef, mechanic, healthcare worker).

- You can always take further education later (like *EUX*, which combines VET with academic subjects and gives access to higher education).

How to Choose?

Ask yourself:

- Do I enjoy academic school subjects and want to study more? → Look at **STX**, **HHX**, **HTX**, or **HF**.
- Do I prefer hands-on learning and want to start working sooner? → Look at **VET** or **EUX**.
- Am I unsure and want to keep all doors open? → **STX** is the most flexible option.

Bonus Tip: Use Your Background as a Strength

You speak Danish and come from a multicultural background. That's a huge asset! Fields like international business, language teaching, or social work often value that perspective. You could also consider learning Nepali reading/writing if you want to keep that connection strong — it might open doors later for global or community-related work.

My Recommendation (if you're unsure):

Try attending a few **open house events (åbent hus)** at nearby **STX**, **HTX**, or **HHX** schools. Talk to students and teachers. If you're strong academically and want flexibility, **STX** is usually the safest and most general choice.

Let me know what subjects you enjoy most or if you have a dream job — I can help narrow it down more.
