

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Nigeria. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! Since you're 16 and just finished primary school in Denmark, it sounds like you're at a key transition point in your education. In Denmark, after primary school (folkeskole), you typically choose between different secondary education options depending on your interests, strengths, and future plans. Here's a breakdown of the main paths and what might work best for you:

🎓 Main Educational Paths in Denmark After Primary School

1. Gymnasiale Uddannelser (General Upper Secondary Education)

These are academically focused and usually last **3 years**, preparing you for university or other higher education.

- **STX (Studentereksamen):** Broad and academic – includes humanities, sciences, social studies, and languages.
- **HHX (Higher Commercial Examination):** Focuses on business, economics, and marketing.
- **HTX (Higher Technical Examination):** Focuses on technology, science, and IT.
- **HF (Higher Preparatory Examination):** A 2-year program – more flexible, good if you want a shorter option or didn't do well in the final year of folkeskole.

Good for you if:

You enjoy school subjects, want to go to university, and aren't sure yet what exact career you want.

2. EUD (Erhvervsuddannelse / Vocational Education and Training)

These combine school and apprenticeship. You learn a trade or practical skill (e.g., electrician, mechanic, chef, social care assistant).

- Typically 3–5 years
- You get both classroom teaching and real job experience

Good for you if:

You prefer hands-on learning and want to start working or earning sooner.

3. EUX – The Combo Path

A combination of **EUD and general education** – you get both a vocational qualification **and** a study certificate that allows access to university.

Good for you if:

You want both options open – practical skills **and** the chance to go to university later.

How to Choose What's Right for You

Here are some questions to guide you:

- **Do you enjoy academic subjects like math, science, literature, or languages?**
→ Consider STX, HHX, or HTX.
- **Do you want to work with your hands or get a job soon?**
→ EUD could be perfect.
- **Do you want flexibility — practical skills but still keep the door open to university?**
→ Look into EUX.
- **Not sure yet what you want?**
→ STX or HF give you broad options to figure it out later.

Bonus: Being of Nigerian Background

Your cultural background is an asset. It can help shape your perspective in global topics, language learning, social studies, or even international business. For example:

- If you're interested in **global business or development**, **HHX** might suit you.
- If you're drawn to **technology** or engineering, **HTX** is a strong choice.
- If you want to work with **people** (e.g., as a nurse, teacher, or social worker), **STX or EUD/EUX social care programs** may be the way.

Next Steps

1. **Talk to a UU-vejleder (educational counselor)** – They can guide you based on your interests and grades.
2. **Visit open house events** at nearby schools (often in January/February).
3. **Try a short internship or “brobygning”** program to test a path before committing.

If you tell me a bit more about what subjects or careers interest you, I can give more specific advice. Would you like to go to university someday, start working earlier, or maybe do something creative or technical?
