

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Palau. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's great that you're thinking ahead about your future! Since you're 16 and just finished primary school in Denmark (likely meaning "folkeskole" – 9th or 10th grade), you're at the point where you choose between different **youth education paths** ("ungdomsuddannelser") in Denmark.

Here's a breakdown of the **main options**, depending on your interests, strengths, and goals:

1. Gymnasiale uddannelser (General upper secondary education)

These prepare you for **university** later on.

Types:

- **STX** (Alment gymnasium): Focus on humanities, sciences, and social sciences.
- **HHX** (Handelsskole): Focus on business, economics, and international trade.
- **HTX** (Teknisk gymnasium): Focus on technology and natural sciences.
- **HF** (Højere Forberedelseseksamen): A 2-year general program, often for students who want a shorter academic route or didn't do 10th grade.

Good if you:

- Want to go to university later
- Enjoy subjects like languages, science, economics, or tech
- Like theory and academic study

2. Erhvervsuddannelser (EUD) (Vocational education and training)

This is a hands-on path where you train for a **trade or profession**, like:

- Electrician
- Carpenter
- Hairdresser
- Health care assistant
- Mechanic
- Chef

- IT support

Includes both **school** and **apprenticeship (praktik)** in a company.

Good if you:

- Want to start working sooner
- Like practical work
- Prefer earning money during education
- Want a clear path to a job

You can still continue to higher education from EUD through **EUX**, a mix of vocational training and academic subjects.

What to consider when choosing:

- **Do you enjoy studying theory and reading?** → Go for gymnasial education.
- **Do you prefer doing things with your hands, building, fixing, or helping people directly?** → Vocational education might suit you better.
- **Not sure yet?** You can consider taking a **10th grade (efterskole or regular school)** to give yourself a year to mature, explore, or improve skills.

Recommendations based on you:

Since you're fluent in Danish, born in Denmark, and just finished primary school, you're fully eligible for any path. Being from a Palauan background might also make **international business, languages, or global studies** interesting for you – HHX could be a great option if you're interested in those.

Also, don't underestimate **HTX** if you like tech or science – it's growing in popularity and leads to great jobs or university programs.

Next steps:

1. Visit **educational fairs** or open houses (Åbent Hus) at local gymnasiums and vocational schools.
2. Talk to a **UU-vejleder** (educational advisor) at your school or municipality – they'll help you match your interests with programs.
3. Think about a **long-term goal**: university? a profession? owning a business? Helping people?

If you tell me more about:

- What subjects you enjoy
- Whether you prefer academic or hands-on work
- Any future dream job or goal

...I can help you choose more specifically.
