

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Paraguay. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a big and exciting step—congrats on finishing primary school! Since you're 16 and just finished primary school in Denmark, you're likely deciding between the different **youth education options** available in the Danish system. Here's a breakdown of your main options and how you might choose the best path based on your interests and goals.

Main Educational Paths After Primary School in Denmark

1. **Gymnasiale uddannelser (Upper Secondary Education – Academic)**

These are for students who want to pursue higher education (like university).

- **STX** (Studentereksamen): General and broad education with humanities, science, and social studies.
- **HHX** (Handelsskolens studentereksamen): Focus on business, economics, and international trade.
- **HTX** (Teknisk studentereksamen): Focus on science, technology, and engineering.
- **HF** (Højere forberedelseseksamen): A shorter 2-year program, more practical and good for those who want a more flexible route to further education.

Choose this if:

- You enjoy school and academic subjects.
- You're interested in going to university later.
- You like theory and a mix of subjects.

2. **Erhvervsuddannelser (Vocational Education and Training – VET)**

These combine school with practical work experience (apprenticeship).

Examples:

- Electrician, mechanic, hairdresser, chef, carpenter, etc.
- You start with a school-based basic course, then move into a company apprenticeship.

Choose this if:

- You prefer hands-on learning over theory.
- You want to get a job faster.
- You're interested in a skilled trade.

3. **Kombinerede uddannelser (EUX)**

A combination of vocational training and academic education.

- You get both a vocational qualification **and** a studentereksamen-level exam.
- Allows you to work in a trade **or** go to university.

Choose this if:

- You want to keep your options open.
- You're ambitious and ready for a challenge.
- You want practical skills and academic knowledge.

Based on what you've shared:

- You're fluent in Danish and born here—so you won't face language barriers.
- You have a multicultural background, which could be a strength in fields like international business, languages, or intercultural work.
- If you like working with people or solving problems, **HHX** or **EUX** might be good fits.
- If you're more hands-on and want to work sooner, **a vocational path (EUD)** could be smart.
- If you're still unsure, **STX** gives you broad general education and time to explore.

Questions to Ask Yourself:

- Do I enjoy school and studying?
- Do I want to go to university?
- Do I prefer learning by doing?
- What kind of work environment do I imagine myself in?

If you tell me a bit more about what subjects you enjoy or what you're curious about (like technology, art, working with people, helping others, etc.), I can give you a more tailored recommendation.

Would you like to explore that?
