

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Romania. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself — that's really helpful for giving you the best advice. Since you're 16, just finished primary school (which in Denmark typically means *folkeskole* through 9th or 10th grade), you're at a key point where you choose what kind of youth education to start. Here are your main options in Denmark, and I'll also include thoughts based on your background and opportunities:

Main Educational Paths in Denmark After Folkeskole

1. Gymnasium (STX, HHX, HTX, HF) – Academic Upper Secondary Education

These are 2–3 year programs that prepare you for university.

- **STX (Almen gymnasium)** – Broad, academic subjects (humanities, natural sciences, social sciences). Good if you're unsure and want to keep many doors open.
- **HHX (Handelsgymnasium)** – Focuses on business, economics, marketing. Great if you like commerce, management, or entrepreneurship.
- **HTX (Teknisk gymnasium)** – Focus on technology, science, engineering. Ideal if you're interested in tech, IT, or innovation.
- **HF (Højere forberedelseseksamen)** – 2-year program, more practice-oriented and flexible. Good if you want a shorter route to professions or university.

Recommended if:

You like studying, enjoy schoolwork, and might want to go to university later.

2. EUD / EUX – Vocational Education and Training

These combine classroom learning with apprenticeships in real jobs.

- **EUD:** Focused on trades (e.g., electrician, carpenter, hairdresser, chef).
- **EUX:** Combines vocational training *and* academic classes, so you can go to university after too.

Recommended if:

You prefer hands-on learning, want to earn money during your education, and possibly work earlier. EUX is great if you want both practical skills and the option to study later.

3. International Options (e.g., IB - International Baccalaureate)

Taught in English, with a global focus.

Recommended if:

You're interested in studying or working internationally, or want a very academic challenge. May be a good fit with your Romanian/Danish background and potential for strong multilingual skills.

Some Personal Suggestions for You

Since you're fluent in Danish, born and raised in Denmark, but with Romanian roots, you may have a strong cultural understanding and adaptability. That gives you an edge in:

- **International business**
- **Languages and communication**
- **Tech/digital professions**
- **Entrepreneurship (especially cross-border or digital)**

If you enjoy school and want to keep university open as an option, **STX or HHX** might be great.

If you prefer to work sooner or learn practically, **EUX** is a smart and future-safe choice (many students combine IT, business, or technical skills with it).

To Help Decide, Ask Yourself:

- Do I enjoy academic subjects (e.g., math, languages, science)?
 - Do I prefer learning by doing (practical work)?
 - Do I want to go to university later?
 - What careers or types of work interest me?
-

If you want, I can also help you explore careers or school options based on your interests or subjects you enjoy most. Want to try that?
