

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Saint Vincent and the Grenadines. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself! At 16 and having just finished primary school in Denmark, you're at a key point in your educational journey. In Denmark, the next step typically involves choosing between different **youth education programs**, depending on your interests, goals, and how academic or practical you want your education to be.

Here's a breakdown of your main options and some guidance:

🎓 1. Gymnasiale Uddannelser (Upper Secondary School Programs)

These are more academic and prepare you for university.

Common choices:

- **STX (Studentereksamen)**: Focus on general academic subjects like humanities, science, and social studies.
- **HHX (Højere Handelseksamen)**: Focus on business, economics, and marketing.
- **HTX (Højere Teknisk Eksamen)**: Focus on technology, natural sciences, and innovation.
- **HF (Højere Forberedelseksamen)**: A 2-year program with a more flexible and practical approach – often chosen by slightly older students or those who want a shorter path.

● Recommended if:

You enjoy school, academic subjects, and may want to go to university later (e.g., to become a teacher, engineer, psychologist, doctor, etc.).

🔧 2. Erhvervsuddannelser (Vocational Education & Training – EUD)

These combine school and hands-on work experience (praktik), leading to a specific profession like:

- Carpenter, electrician, hairdresser
- Chef, mechanic, child care assistant
- IT support, business clerk, etc.

● Recommended if:

You prefer practical learning, want to start working earlier, or enjoy learning by doing.

Some programs even allow you to later continue to higher education (via **EUX**, which combines vocational training with a gymnasial-level academic component).

What Should You Think About?

Ask yourself:

- Do I enjoy academic work, or do I prefer learning by doing?
- Do I want to go to university?
- Do I already have an idea of a career I'd like to pursue?
- Do I want to explore different fields first?

You could also talk to an **educational counselor (studievejleder)** at your school or municipality (kommune), who can help you explore options in your area.

Example Paths Based on Interests:

Interest	Recommended Path
Interested in business	HHX or EUD with a business focus
Like science or tech	HTX or STX with science track
Want a flexible academic path	HF
Like working with hands/tools	EUD (e.g., electrician, mechanic)
Want to help people	STX (health track) or EUD in care
Interested in IT	HTX or EUD with IT specialization

Bonus: Your Background

Since you're fluent in Danish and have a multicultural background, consider how your skills and perspective might also open doors in:

- **International business**
- **Translation/interpretation**
- **Tourism**
- **Diplomacy or international relations**

These fields usually require university education, so gymnasiale programs like STX or HHX would be good starting points.

If you share more about your **interests, strengths, and goals**, I can help narrow it down further. Would you like that?
