

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from San Marino. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — and congrats on finishing primary school! That's a big milestone. In Denmark, after primary/lower secondary school (folkeskole), you have several good options depending on your interests, strengths, and future goals. Here's a breakdown of your main paths:

🎓 1. General Upper Secondary Education (Gymnasiale Uddannelser)

Ideal if you enjoy academic subjects and are possibly interested in university later.

Most common options:

- **STX (Studentereksamen)** – Focuses on humanities, social sciences, and natural sciences.
- **HHX (Higher Commercial Examination)** – Focus on business, economics, and marketing.
- **HTX (Higher Technical Examination)** – Focus on science, tech, and engineering.
- **HF (Higher Preparatory Examination)** – 2-year program, more flexible and shorter than STX, useful if you want to get to university quickly or don't like a 3-year structure.

✓ Best for: Keeping many future paths open (including university).

! Entry: Usually requires decent grades and interest in academic subjects.

🔧 2. Vocational Education and Training (EUD – Erhvervsuddannelse)

Ideal if you're more practical or want to start working earlier.

- Combines school and apprenticeship (praktik) in real workplaces.
- Fields: mechanics, carpentry, healthcare, cooking, IT, design, and more.
- You can later take **EUX** if you want both a vocational and academic qualification (so you keep university as an option too).

✓ Best for: Getting a job quickly or hands-on learning.

! Entry: Must be motivated and often find a workplace for apprenticeship.

👤 3. International or Bilingual Options

If you want to strengthen your international background (given your San Marino heritage), you could explore:

- **International Baccalaureate (IB)** – Taught in English; internationally recognized.
 - Could be useful if you ever consider studying abroad.
-

So, What Should You Do?

Ask yourself:

- Do you enjoy school and studying theory? → Go for **STX**, **HHX**, **HTX**, or **IB**.
 - Are you more hands-on or want to enter the workforce earlier? → Explore **EUD** or **EUX**.
 - Not sure? → Consider **HF**, or visit a local **UU-vejleder (educational guidance counselor)**.
-

Recommendations Based on Your Profile

Since you're fluent in Danish, born and raised in Denmark, and probably comfortable in the system:

- If you're unsure but want to keep your future open → **STX** or **EUX**.
 - If you love tech, design, or science → **HTX**.
 - If you're into economics, business, or want to help in your family's future business (maybe in Denmark or San Marino) → **HHX**.
 - If you're practical and want to earn while learning → **EUD** with the **EUX** option.
-

If you tell me more about your interests (e.g., favorite subjects, dream jobs, hobbies), I can give you an even more tailored recommendation.
