

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Saudi Arabia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself! You're at an important crossroads, and it's great that you're thinking carefully about your next step. Since you just finished **primary school** (9th or 10th grade in Denmark), you have several strong options depending on your interests, goals, and learning style.

Main Educational Paths After Primary School in Denmark:

1. Gymnasium (STX, HTX, HHX) – General Upper Secondary Education

- **Best if you're aiming for university** later.
- Takes 3 years.
- Taught mostly in Danish.

Types:

- **STX (Almen studentereksamen)** – broad, academic, with languages, social sciences, natural sciences.
- **HTX (Teknisk studentereksamen)** – focus on science and technology.
- **HHX (Handelsstudentereksamen)** – focus on business, economics, and marketing.

2. EUX – Vocational + Academic

- Combine **practical job training** with a **studentereksamen**.
- Good if you want **both hands-on experience** and the **option to go to university** later.
- Takes about 4 years.

3. EUD – Vocational Education and Training

- More practical.
- Prepares you to enter a trade (e.g. electrician, hairdresser, carpenter, healthcare worker).
- Shorter than gymnasium: 2–4 years depending on the program.

4. IB (International Baccalaureate)

- Taught in English, international focus.
- Great if you're considering **studying abroad** or in an international field.
- Usually takes 2 years, after a prep year.

What Should You Consider?

Ask yourself:

- Do I enjoy **academic subjects** like math, history, biology, etc.?
- Do I want a **practical job sooner**, or do I want to go to **university**?
- Am I interested in **technology, business, science**, or **creative fields**?
- Would I thrive more in a **hands-on** or **classroom-focused** environment?

💡 My Recommendations (Based on Your Info)

Since you're fluent in Danish and educated in Denmark, you have access to all options. Here's a short guide based on your situation:

Your Goal	Suggested Path
Undecided but want to keep doors open	STX (General Gymnasium)
Interested in tech or engineering	HTX or EUX Tech
Interested in business, finance, or starting a company	HHX or EUX Business
Like working with your hands or learning by doing	EUD or EUX
Curious about international studies	IB (at an international school)

🌍 Bonus Perspective (Cultural Considerations)

Since you have a Saudi background, you might also:

- Be bilingual (Arabic + Danish), which is a **huge asset** in fields like **international relations, translation, or diplomacy**.
- Value practical paths that lead to work quickly — if so, **EUX or EUD** might be great.
- Consider eventually studying in the Middle East or another country — then the **IB or STX** can be very helpful.

If you'd like, I can help you explore each path more deeply, or even look into specific schools or programs near you. Want to share your interests or long-term dreams a bit more?
