

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Singapore. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! It's great that you're thinking ahead about your educational path. Since you're 16 and have just finished primary school in Denmark, I assume you might be referring to **folkeskole** and are now considering your next step, which in Denmark usually means choosing between different **youth education programs**.

🎓 Your Main Options in Denmark After Folkeskole

1. Gymnasiale uddannelser (Upper Secondary Education – General)

These are aimed at students who want to go to **university later**. You'd typically be looking at:

- **STX (Studentereksamen)** – Broad academic focus; good if you're unsure what you want to specialize in.
- **HHX (Higher Commercial Examination)** – Focus on business, economics, marketing.
- **HTX (Higher Technical Examination)** – Focus on science, technology, and innovation.
- **HF (Higher Preparatory Examination)** – Shorter (2-year) general academic program, good for people who want a more practical or flexible option.

✅ **Recommended if:** You're academic, interested in university later, or not sure what to specialize in yet.

2. Erhvervsuddannelser (Vocational Education and Training – VET)

This is a hands-on path that combines school with apprenticeships. You learn a trade and can go straight into work or continue studying later.

- Examples: Carpenter, electrician, graphic designer, healthcare assistant, IT supporter.
- You can combine a VET program with **EUX**, which lets you also earn a qualification to go to university.

✅ **Recommended if:** You prefer practical learning or want to start earning and working sooner.

3. International or IB Programs

If you're fluent in English and interested in international opportunities, you could consider the **International Baccalaureate (IB)** offered at some Danish schools.

✓ **Recommended if:** You want to study or work internationally later, or prefer English-language learning.

Your Background: A Strength

Being Danish-born with Singaporean roots can be a unique advantage. You might:

- Learn **Mandarin, Malay, or Tamil** if you haven't already – it could open doors in business, diplomacy, or global work.
 - Consider international education or careers where your cultural knowledge is a plus.
-

How to Decide

Ask yourself:

- Do I enjoy academic subjects like science, languages, history? → **Gymnasium**
 - Do I want to work with my hands, in design, IT, care, or trades? → **VET or EUX**
 - Do I want flexibility and maybe study abroad? → **IB or STX**
 - Do I want a shorter path that leads to the workforce faster? → **HF or VET**
-

Suggested Pathways (Example Scenarios)

A) You want to keep your options open → Go for STX with a mix of science/humanities.

B) You love tech or science → HTX, or VET with EUX in IT.

C) You're into business or entrepreneurship → HHX.

D) You want to travel or study abroad → IB program or HF followed by international studies.

E) You like hands-on work and want to earn money soon → VET with apprenticeship, or EUX for both work and university options.

If you tell me more about what you're interested in (subjects, hobbies, what kind of job you dream of), I can help narrow it down even better.
