

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Solomon Islands. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself — and congratulations on finishing primary school! That's a big milestone. Since you're 16, you're likely at the stage where you're considering upper secondary education in Denmark. Here's a breakdown of your options and some advice to help you decide what might be best for you:

Main Education Paths After Primary School in Denmark

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are academically focused and prepare you for university.

- **STX (Almen studentereksamen)** – General academic focus, broad subject choices.
- **HHX (Højere handelseksamen)** – Business and economics-focused.
- **HTX (Højere teknisk eksamen)** – Science, technology, and engineering.
- **HF (Højere forberedelseksamen)** – A 2-year version, more flexible, often for older students or those wanting a faster route to further education.

✓ *Best if you want to go to university or aren't sure yet what you want to do.*

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

These prepare you directly for the job market and skilled trades.

- Includes apprenticeships and hands-on work experience.
- Options include everything from hairdressing to carpentry, IT support, and healthcare.

✓ *Great if you want to start working sooner or prefer hands-on learning.*

3. Kombinerede forløb (EUX)

This combines vocational training with general education – gives you both a trade and eligibility for higher education.

✓ *Good if you want both practical skills and the option to go to university later.*

How to Choose?

Ask yourself a few questions:

- **Do I like academic subjects or prefer learning by doing?**

- **Do I want to go to university, or start working earlier?**
 - **What are my interests? (e.g., tech, health, business, design, etc.)**
-

Considering Your Background

Being of Solomon Islands descent and fluent in Danish gives you a unique cultural and language perspective. You might also consider:

- Exploring international studies or languages.
 - Looking into programs that support students from diverse backgrounds — Denmark has mentorship and support programs in many schools.
 - Long-term goals: Would you ever consider studying or working abroad (e.g., in the Pacific, Europe, or beyond)? Then STX or EUX could be more flexible for future opportunities.
-

My Recommendation (based on what you've shared):

If you're still figuring things out and want to keep your options open, **STX** or **EUX** might be ideal. STX gives you broad academic skills and university access, while EUX adds a practical edge that can open job paths as well as higher education.

But if you're more hands-on and have a clear interest (like mechanics, design, care, or cooking), a **vocational education (EUD)** might be a better and faster fit.

If you tell me what subjects you enjoy or what kind of job you might want one day, I can help narrow it down even more.
