

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Somalia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Since you're 16, just finished primary school in Denmark (likely **9th grade** or **10th grade**), and are fluent in Danish, you're at a key decision point in the Danish education system. Here are your main options, along with guidance based on different goals:

🎓 1. Gymnasiale Uddannelser (Upper Secondary Education)

If you're interested in **further academic studies** (like university), consider one of the **four gymnasium programs**:

➤ STX (Alment Gymnasium)

- Broad and academic focus (sciences, languages, history, social studies).
- Best if you're unsure what to study later or want university options open.

➤ HTX (Teknisk Gymnasium)

- Focus on technology, science, and innovation.
- Great if you're interested in engineering, IT, or technical fields.

➤ HHX (Handelsgymnasium)

- Focus on business, economics, and marketing.
- A good path if you're considering working in business, finance, or starting a company.

➤ HF (Højere Forberedelseseksamen)

- A 2-year alternative, less theoretical, more practical.
- Good for those who want quicker access to higher education or are more mature.

Recommendation: If you enjoy learning, want flexibility, and are thinking about going to university someday, **STX** is the safest and broadest choice.

🔧 2. Erhvervsuddannelser (Vocational Education - EUD)

If you want to **start working sooner** or you enjoy **hands-on learning**, this could be a great fit. You'll split time between school and a paid apprenticeship (praktik).

Examples:

- Electrician, plumber, carpenter
- Healthcare assistant
- Hairdresser
- IT support or coding

Recommendation: Choose this if you enjoy practical work or already know you'd prefer a skilled job to studying long-term.

What You Might Consider:

Since you're fluent in Danish, have Somali heritage, and finished Danish primary school, you have a **strong foundation**. Here are a few paths based on different interests:

Your Interests	Suggested Path
You like school subjects and maybe university later	STX
You like science/tech , less focus on languages	HTX
You're into business, economy, or entrepreneurship	HHX
You want to start working sooner or dislike long academic paths	EUD (vocational)
You prefer a shorter, practical school program	HF

Final Advice:

- **Talk to a guidance counselor** at your school or "UU-vejleder" — they can help you explore all options based on your grades and interests.
- **Visit open house events** at local gymnasiums or vocational schools.
- **Think about what you enjoy** doing in your free time — this can be a big clue.

Would you like help thinking through your interests or comparing specific gymnasiums or EUD programs near where you live in Denmark?
