

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Spain. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

Thanks for sharing that! Since you've just finished primary school in Denmark and you're fluent in Danish, you're at an important crossroads. In Denmark, after primary school (folkeskole), you typically have a few main educational paths to choose from, depending on your interests, strengths, and long-term goals.

Overview of Your Options After Primary School:

1. Gymnasiale uddannelser (Upper Secondary Education – Academic Path)

If you're interested in academic subjects and possibly university later on, this is a strong choice.

Options include:

- **STX (Studentereksamen)** – Broad, academic program with subjects like languages, science, and humanities.
- **HHX (Higher Commercial Examination Programme)** – Focus on business, economics, and international trade.
- **HTX (Higher Technical Examination Programme)** – Science, technology, and engineering-focused.
- **HF (Higher Preparatory Examination)** – Shorter, more flexible, often for students who want to go to university or college but didn't take the traditional academic path.

 Good for you if: You enjoy studying, want to go to university, and are not yet sure exactly what career you want.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

Combines school and hands-on training in a trade, craft, or profession.

Examples: electrician, carpenter, chef, IT supporter, health care assistant.

 Good for you if: You enjoy learning by doing, want to start working earlier, or have a specific profession in mind.

You can also take the **EUX** program, which combines vocational training with an upper secondary academic diploma. This is great if you want the option to either work right away **or** go to university later.

3. International Opportunities

With your Spanish background, you might consider bilingual programs or international schools (such as International Baccalaureate, IB), especially if you're thinking about studying or working abroad in the future.

 Good for you if: You're globally minded, want to strengthen your English or Spanish skills, or plan to study outside Denmark someday.

Tips Based on Your Background

- **Fluent in Danish** is great—it means all options are open to you.
 - With **Spanish heritage**, you could make language and international studies a strength. HHX, STX (with languages), or IB could be good fits.
 - If you enjoy hands-on work or want a faster route to the job market, EUD or EUX can be very rewarding and practical.
-

Questions to Ask Yourself:

- Do I enjoy school subjects and want to study more?
 - Am I more interested in practical or hands-on learning?
 - Do I want to go to university?
 - Would I like to work internationally someday?
-

If you can tell me more about your interests (e.g., favorite subjects, hobbies, future dreams), I can help tailor this even more to you.
