

Uddannelsesvejledning i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Sudan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — and congratulations on finishing primary school! That's a big milestone. Choosing your next step is important, but don't worry — Denmark has a flexible and supportive education system that gives you options even if you change your mind later.

Here are the main paths you can consider after primary school in Denmark (after 9th or 10th grade), along with some guidance based on your situation:

1. Gymnasiale Uddannelser (Upper Secondary Education)

These are academic programs that prepare you for university.

- **STX (Almen studentereksamen):** General academic program — great if you enjoy subjects like Danish, history, social studies, languages, or sciences.
- **HHX (Højere handelseksamen):** Focus on business, economics, marketing — ideal if you're curious about trade, finance, or entrepreneurship.
- **HTX (Højere teknisk eksamen):** Focus on technology, IT, science — great if you enjoy math, science, or engineering.
- **HF (Højere forberedelseksamen):** Shorter, 2-year program, more practice-oriented, often used by students who want to go to university colleges or need flexibility.

Recommendation:

If you're academically inclined or still unsure of your career path, **STX or HHX** are great choices that keep doors open. For example:

- If you like languages, literature, or social studies → **STX**
- If you're interested in business or international careers → **HHX**

2. Erhvervsuddannelser (VET – Vocational Education and Training)

You combine school with apprenticeship in a company. You get paid during the practical periods, and it leads to a skilled trade job (like electrician, carpenter, hairdresser, etc.).

Recommendation:

If you enjoy hands-on work, want to earn money earlier, or are interested in a specific craft or profession — this is a strong path. Some VET programs also let you continue to higher education later (EUX option).

3. 10th Grade (10. klasse)

Optional year to improve grades, mature a bit more, or explore options like internships.

Recommendation:

If you're unsure what direction to take, or want to boost your skills and confidence before choosing, **10th grade** (at a local school or efterskole) can be helpful.

Extra Advice

- **Talk to a school counselor** (studievejleder) — they can help you explore options tailored to your interests.
 - **Consider your interests and strengths** — do you enjoy theory or practice? Group work or solo tasks? Creative or structured environments?
 - **Look at role models** — people from your community or family — what paths did they take? What worked or didn't?
-

With Your Background...

- Being fluent in Danish and having a multicultural background can be a huge strength — in business, healthcare, social work, teaching, law, international affairs, and more.
 - You might consider careers that **combine culture and communication**, such as:
 - Interpreter
 - Social worker
 - Teacher
 - Nurse or doctor
 - Entrepreneur
 - Software developer (if you're into tech!)
