

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Suriname. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — it's great that you're thinking ahead about your next steps. In Denmark, after finishing **primary school (folkeskole)**, you have several solid educational paths to choose from depending on your interests, strengths, and future goals.

Here's an overview of your main options at 16:

1. Gymnasium (General Upper Secondary Education)

Best if: You enjoy academic subjects and might want to go to university later.

Options:

- **STX (Almen studentereksamen):** Broad academic focus (science, languages, social science).
- **HHX (Højere handelseksamen):** Focus on business, economics, and international studies.
- **HTX (Højere teknisk eksamen):** Focus on technology, science, and IT.
- **HF (Højere forberedelseseksamen):** Shorter 2-year program, more practical, also leads to higher education.

Recommended if:

- You're curious about subjects like languages, science, economics, or technology.
- You may want to go to university or a professional college (erhvervsakademi or professionshøjskole).

2. EUD (Erhvervsuddannelse / Vocational Education and Training)

Best if: You like hands-on work and want to start a career sooner.

Fields include:

- Electrician, carpenter, mechanic, chef, social and health care worker, etc.

You earn a salary during the apprenticeship period.

Recommended if:

- You prefer learning by doing.
- You're interested in a specific trade or job.
- You want to enter the job market earlier.

3. EUX (Combination of Vocational + Academic)

Best if: You want both hands-on training **and** the option to go to university later.

Example: Become an electrician **and** get a high school diploma at the same time.

Recommended if:

- You're motivated and want flexibility.
- You're not 100% sure yet if you want to work or study more later.

Bonus Consideration: Your Surinamese Background

Your unique background could give you an edge in:

- Language studies
- International business or diplomacy
- Cultural exchange programs

If you speak any Surinamese languages or have connections to your heritage, that could enrich your profile — especially in programs like HHX or STX.

So, What Should You Do?

To decide, ask yourself:

- Do I enjoy school and learning new subjects? → Consider **STX/HTX/HHX**.
- Do I want to work with my hands and learn a trade? → Consider **EUD**.
- Do I want a mix of both and keep many doors open? → Consider **EUX**.
- Am I unsure? → **HF** is a more flexible, shorter academic option.

My Personal Suggestion (Based on What You've Shared):

Since you're fluent in Danish, born in Denmark, and have a multicultural background, **HHX** or **STX** could be strong choices. They give you academic skills and open the path to university or professional education later. If you're unsure or want more hands-on work, **EUX** could be a perfect balance.

If you want, I can help you:

- Compare specific schools near where you live
- Explore career ideas based on your interests
- Help draft a personal education plan (uddannelsesplan)

Let me know!
