

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Switzerland. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that — you're at a really important decision point, and it's great that you're thinking ahead. Since you've just finished **primary school in Denmark**, you're likely looking at options for **secondary education** (called *ungdomsuddannelse* in Danish). I'll walk you through your main options, and then help narrow them based on your background and potential interests.

Main Educational Paths After Primary School in Denmark

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are academically oriented and prepare you for university:

- **STX** (*Almen studentereksamen*) – broad academic program (languages, science, humanities).
- **HHX** (*Højere handelseksamen*) – business and economics focused.
- **HTX** (*Højere teknisk eksamen*) – technology and science focused.
- **IB (International Baccalaureate)** – international program in English; often a great fit for multicultural students.

2. Erhvervsuddannelser (Vocational Education and Training – VET)

More hands-on; leads to skilled trades (like electrician, carpenter, chef, etc.) but also includes programs in e.g. IT, business, or health.

- Often includes a mix of school and apprenticeship.
- You can also later take a *EUX*, which combines VET and academic qualifications, giving access to higher education too.

Given You're:

- **Danish-born and fluent in Danish** – You have full access to any education option in Denmark.
- **Swiss family background** – You might consider international flexibility, which makes the **IB** or a solid general upper-secondary like **STX** appealing.
- **Just finishing primary school** (9th or 10th class) – You're right on time to apply for your next step.

Recommendations Based on Common Interests

Here are some suggestions based on possible interests — tell me more if you have any specific passions:

If you're interested in...	Recommended path(s)
University later	STX, HTX, HHX, or IB
Science/technology	HTX or IB
Business/economics	HHX or IB
International career	IB or STX with strong language focus
Hands-on/working earlier	VET or EUX
Creative/arts	STX with arts focus, or relevant VET path

How to Choose Wisely

1. **Visit schools** – Most offer open house events (*Informationsaften*).
2. **Talk to guidance counselors** – Your *UU-vejleder* can help you.
3. **Try a *Brobygning* (bridge-building internship)** – lets you try out different programs for a few days.
4. **Consider your long-term flexibility** – If you're unsure, STX or IB keep the most doors open.

Would you like me to suggest a possible path based on your interests (e.g. science, languages, tech, business, art)? Or help compare STX vs IB or another option more specifically?
