

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Timor-Leste. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! Since you're 16, living in Denmark, and have just finished primary school (which likely means *folkeskole*), you're now at the stage where you'll be choosing a **youth education** path (*ungdomsuddannelse*). In Denmark, there are two main routes after folkeskole:

🎓 1. Gymnasial Uddannelse (General Upper Secondary Education)

If you're interested in going to university later, this is the typical path.

- **STX** (*Alment Gymnasium*): Focuses on general subjects like languages, science, and humanities.
- **HHX** (*Handelsskole*): Focus on business, economics, and international trade.
- **HTX** (*Teknisk Gymnasium*): Focus on technical and scientific subjects like technology and innovation.
- **HF** (*Højere Forberedelseseksamen*): A 2-year program for those who want a more flexible or shorter path to higher education.

This path is good if:

- You enjoy academic subjects
- You might want to go to university later
- You're curious about fields like science, economy, languages, or humanities

🔧 2. Erhvervsuddannelse (Vocational Education and Training - EUD)

If you're more hands-on and want to get a job faster or do an apprenticeship.

- Examples: Electrician, carpenter, health care assistant, mechanic, hairdresser, chef, etc.
- Includes time at school *and* as an apprentice at a workplace.
- Takes 3-5 years depending on the field.

This path is good if:

- You like practical work
- You want to earn money while you study (apprenticeships are paid)
- You're less interested in purely academic work

Given Your Background:

You're fluent in Danish, and born/raised in Denmark — that's a strong foundation. But having Timor-Leste roots might also be a unique asset. If you're interested in areas like **international relations**, **global development**, **languages**, or **intercultural communication**, you might consider STX or HHX.

So What Should You Do?

Here's a short checklist to help:

Question	Recommendation
Do you enjoy school subjects like history, Danish, English, or biology?	STX or HF
Do you like numbers, business, or economics?	HHX
Do you like science and tech (e.g., physics, programming)?	HTX
Do you prefer working with your hands or learning a trade?	EUD
Do you want a shorter, flexible academic route?	HF

Final Tips:

- **Visit open house events** at local gymnasiums or vocational schools.
- **Talk to a guidance counselor** (*uddannelsesvejleder*) — they can help you figure out what suits your interests.
- **Try an internship** (a *brobygning* or *praktik*) — you might discover what you enjoy by doing.

If you tell me more about what subjects or activities you like (school, hobbies, future dreams), I can give even more specific advice!
