

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Trinidad and Tobago. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! Since you're 16, fluent in Danish, and just finished primary school in Denmark (which usually ends around age 15–16 with *folkeskole*), you're likely now at the stage where most Danish students choose between a few upper secondary education paths (*ungdomsuddannelse*). Your decision will depend on your interests, goals, and strengths. Here's a breakdown to help guide you:

Main Educational Paths in Denmark After Primary School

1. Gymnasiale uddannelser (General Upper Secondary Education)

Ideal if you're thinking about university later.

- **STX (Almen studentereksamen)** – The most general and academic. Good if you're interested in humanities, science, or social studies.
- **HHX (Højere handelseksamen)** – Focuses on business, economics, and languages.
- **HTX (Højere teknisk eksamen)** – Great for those into technology, science, IT, or engineering.
- **HF (Højere forberedelseksamen)** – A shorter 2-year version, often for more mature students or those who didn't complete 9th/10th grade with the needed grades. Still gets you to university or higher education.

Choose this path if:

You like academic subjects and want to keep your options open for university in Denmark or abroad.

2. Erhvervsuddannelser (Vocational Education and Training – EUD/EUX)

Ideal if you're interested in a practical career right away, such as:

- Electrician, carpenter, chef, hairdresser, IT technician, healthcare worker, etc.
- **EUX** is a combo: vocational training + academic subjects. You can both work and go to university afterward.

Choose this path if:

You enjoy hands-on learning and might want to start working earlier – but still want the option to study later.

Factors to Consider

- **Do you enjoy studying academic subjects like math, science, literature, etc.?** → Go for **STX**, **HTX**, or **HHX**.
- **Do you prefer learning by doing or are interested in a trade?** → **EUD** or **EUX** could be perfect.
- **Are you unsure about your future path?** → **STX** or **HF** is broader and gives you more time to figure things out.

Extra Tip: Make the Most of Your Background

Being Danish-born with Caribbean heritage (Trinidad and Tobago) gives you a unique cultural perspective. Think about:

- **Language skills:** Maybe learning Spanish or French as an advantage?
- **International focus:** Some gymnasiums or HHX programs have global tracks (*internationale linjer*).
- **Studying abroad** later? Keep English strong and consider programs that prepare you for international education.

Suggestions Based on Interests

Interest	Recommended Path(s)
Business/Economics	HHX, EUX (business)
Science/Tech/IT	HTX, STX (science track), EUX (tech)
Humanities/Languages	STX, HHX
Hands-on jobs/trades	EUD, EUX
Health/Social care	EUD (SOSU), HF
Creative arts	STX (arts track), HF

Would you like to tell me a bit about what subjects or types of activities you enjoy? That could help me make a more personal recommendation.
