

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Uganda. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself—that's a great start. In Denmark, finishing **primary school (folkeskole)** usually means you're around 15–16 years old, just like you. Now you're at a decision point where you choose a **youth education path (ungdomsuddannelse)**. Your choice depends a lot on your **interests, strengths**, and what kind of **career or life** you'd like to have.

Here are the main options you can consider, along with some guidance tailored to your situation:

🎓 1. Gymnasiale uddannelser (General Upper Secondary Education)

These are more academically focused and prepare you for university.

- **STX (Alment gymnasium)** – Wide range of subjects: languages, sciences, social studies. Great if you enjoy school and are unsure what to specialize in yet.
- **HHX (Handelsgymnasium)** – Focus on business, economics, and marketing. Good if you're interested in entrepreneurship or working in international companies.
- **HTX (Teknisk gymnasium)** – Focus on science, technology, and innovation. Ideal if you like math, IT, or engineering.
- **HF (Højere Forberedelseksamen)** – Shorter (2 years) and more practical. A bit more flexible; often taken by students who want to enter certain professions (like healthcare or teaching).

✅ Recommended if:

- You like academic subjects.
- You may want to go to university later.
- You're still exploring what career fits you.

🔧 2. Erhvervsuddannelser (Vocational Education & Training, VET/EUD)

You combine school with an apprenticeship in a company. You can train to become a hairdresser, electrician, chef, mechanic, social care worker, and many more professions.

✅ Recommended if:

- You prefer practical, hands-on work.
- You want to start earning sooner.
- You're motivated by real-world experience.

Extra benefit: After VET, you can still take **EUX**, which combines vocational training with academic subjects, giving you access to higher education too.

What might fit *you* specifically?

Given that:

- You're fluent in Danish.
- You have multicultural background (Ugandan roots + Danish upbringing).
- You just finished primary school (likely 9th or 10th class).

Here are some personalized ideas:

If you're academic and want options later:

➡ **STX or HHX** – These will give you a strong foundation for university and more flexible career options. STX is broader; HHX is great if you're interested in business or international work.

If you're more practical and want to start working sooner:

➡ **VET + EUX** – Let's say you're interested in healthcare, tech, or trades – this lets you get a profession but still keeps university doors open.

If you're still figuring things out:

➡ **10th grade (10. klasse)** – If you feel unsure or need a year to mature, improve grades, or explore your interests, this could be a smart step. Some schools even have 10th-grade programs focused on specific areas (like global studies or sports).

How to Decide?

Ask yourself:

- Do I enjoy school and studying?
 - Do I have a subject I really like? (e.g. biology, business, tech?)
 - Do I want to work with people? With my hands? With ideas?
 - Do I want to go to university someday?
-

Want help choosing?

If you want, I can guide you further if you tell me:

- What subjects you like/don't like?
- What you enjoy doing outside school?
- Any career ideas you've had (even if just dreams)?

That way I can give more specific advice based on your interests and strengths.
