

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Bolivarian Republic of Venezuela. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! At 16, you're at a great stage to shape your future. Since you're in Denmark and have just completed primary school (which likely means *folkeskolen* up to 9th or 10th grade), you're now choosing between the different youth education paths. Here's a clear breakdown of your main options, based on your interests, strengths, and future goals:

🎓 1. Gymnasiale Uddannelser (Academic Upper Secondary Education)

These are great if you're considering university or enjoy subjects like languages, science, history, etc.

- **STX (Studentereksamen):** Broad academic focus – good for university later. You get to choose a study line like social sciences, natural sciences, or languages.
- **HHX (Higher Commercial Examination):** Focuses on business, economics, and international studies – ideal if you like commerce or dream of working in international business or management.
- **HTX (Higher Technical Examination):** For students interested in science, technology, engineering, and IT.
- **HF (Higher Preparatory Examination):** Shorter (2 years), more practical academic route – good if you want to get to university quicker or need a less demanding study load.

✅ *Good if you:*

- Want to go to university later
- Like academic subjects
- Enjoy structured learning

🔧 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

This combines school with work experience. You can become anything from a chef to an electrician to a healthcare assistant.

- Typically 2-5 years depending on the path
- You get paid during apprenticeships
- Ends with a vocational qualification – and you can even go to university later via *EUX* or *EUD+*

✅ *Good if you:*

- Prefer hands-on learning

- Want to start working faster
- Like crafts, design, care work, or practical subjects

⚡ 3. EUX (Combination of Vocational and Academic Education)

A mix of vocational training and gymnasium-level academics. It's demanding but gives you both a trade qualification **and** the chance to go to university.

✓ *Good if you:*

- Want a safety net: both a profession and academic access
- Like a challenge and want all options open

💡 So, what should *you* choose?

Here are some guiding questions for you to think about:

- **Do you enjoy academic work like writing essays or doing math?**
 - ➤ Then STX, HHX, or HTX might suit you.
- **Are you interested in getting a job earlier and working hands-on?**
 - ➤ Consider EUD or EUX.
- **Do you like business, global topics, or languages?**
 - ➤ HHX could be a great fit, especially with your Venezuelan background – international studies and economics could be very relevant.

🧠 Bonus tip: Use your multicultural background!

You're in a great position to eventually work in **international business, diplomacy, education, or even translation**. Being fluent in Danish and likely having Spanish from your family opens lots of doors – from global companies to public service.

If you tell me what kind of subjects or jobs you're interested in (e.g. tech, medicine, business, helping people, working outdoors, etc.), I can give you more tailored suggestions.

Would you like help exploring careers too?
