

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Viet Nam. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

Thanks for sharing that — and congrats on finishing primary school! You're at an important stage, and it's great that you're thinking carefully about your next steps.

In Denmark, after completing **primary school (Folkeskole)** around age 15–16, students typically choose between a few different **youth education programs** depending on their interests and goals. Since you're fluent in Danish and have grown up in Denmark, you have access to all of them.

The Main Education Paths After Primary School:

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are for you if you're interested in **university later** or want to keep your options open.

- **STX (Studentereksamen)** – General academic focus (humanities, science, social studies).
- **HHX (Højere Handelseksamen)** – Business-oriented (economy, marketing, international trade).
- **HTX (Højere Teknisk Eksamen)** – Technology/science focus (engineering, IT, design).
- **HF (Højere Forberedelseseksamen)** – Shorter (2 years), often more practical, good if you want a quicker route to professional education.

Recommended if:

- You enjoy academic subjects.
- You think you might want to go to university.
- You're not sure yet and want to keep doors open.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

This path combines **school and apprenticeship** and leads to a skilled trade or job.

Examples:

- Electrician
- Hairdresser
- Chef
- Mechanic
- Social and health care worker

✓ Recommended if:

- You prefer hands-on work.
- You want to start working sooner (but can still take more education later if you want).
- You're interested in a specific trade or profession.

There's also **EUX**, which combines vocational training with academic subjects — so you can work or go to university after.

3. 10th Grade (10. klasse)

Some students choose to take an **extra year after 9th grade** to mature, figure things out, or improve their grades.

✓ Recommended if:

- You're unsure what you want yet.
- You want more time to develop your academic or social skills.
- You're considering a Gymnasium or EUD, but not quite ready.

How to Choose?

Ask yourself:

- Do I like school and studying?
- Do I prefer learning by doing?
- Do I know what I want to be — or do I want to explore more first?
- What are my strengths (academic, practical, creative, social)?

Side note: Being of Vietnamese background

That can be a strength! Many people with multicultural backgrounds thrive in areas like:

- International business (HHX could be a great choice).
- Healthcare and social fields (EUD with SOSU or nursing track).
- Tech and science (HTX or EUX with an IT focus).

Your bilingual skills and cross-cultural background could open up opportunities in Denmark and internationally.

My Personal Suggestion (based on what you shared):

If you enjoy school and want to keep your options open — **consider STX, HHX, or HTX**, depending on your interests.

If you're not sure yet, or want more time — **10th grade** at a local school or **efterskole** could be a great year to grow, explore, and decide.

If you already have a passion or job interest — **EUD or EUX** might get you started faster.

Would you like help comparing STX, HHX, HTX, or EUD options in your area? Or maybe you're wondering about life after each path (like salary, job chances, university access)? Let me know!
