

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Albania. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question, and it's fantastic that you're reflecting on your next steps! Let's break this down thoughtfully based on your situation.

The Danish Education System — Your Options After Primary School

Since you've completed primary school (folkeskole), you typically have these main paths:

1 Gymnasium / STX (general upper secondary school)

- Academic, broad subjects (languages, science, humanities).
- Prepares for university and higher education.
- Duration: 3 years.

2 HHX (higher commercial exam programme)

- Focus on business, economics, marketing.
- Good if you're interested in commerce or international business.
- Duration: 3 years.

3 HTX (higher technical exam programme)

- Focus on technology, science, IT.
- Ideal if you like STEM (science, tech, engineering, maths).
- Duration: 3 years.

4 HF (higher preparatory exam)

- More practical/theoretical mix, often for students who want a shorter academic path.
- Duration: 2 years.

5 EUD / EUX (vocational education and training)

- Hands-on training + apprenticeship, leads to a trade (e.g. electrician, carpenter, chef, health care).
- EUX gives you both a vocational qualification + academic exam, so you can continue to higher education if you want.

☀ What should guide your decision?

- ✓ **Interests:** What subjects excite you — sciences, business, humanities, creative arts, or practical skills?
 - ✓ **Learning style:** Do you prefer academic study, hands-on work, or a mix?
 - ✓ **Future plans:** Do you think you'd want to go to university later, or are you more drawn to getting into work faster?
 - ✓ **Opportunities:** All these paths are respected in Denmark — the key is finding the right fit for *you*.
-

🌱 Some ideas to consider

- If you're unsure and want to keep doors open → **STX or EUX** could be great.
 - If you like tech, science, or design → **HTX** might suit you.
 - If business, entrepreneurship or international trade interests you → **HHX** is worth looking at.
 - If you want a trade skill and to start earning while learning → **EUD** (or **EUX** if you also want the academic option).
 - If you want a shorter academic path → **HF** can work, especially if you didn't like primary school that much but still want further study.
-

⚡ My suggestion

👉 **Reflect on what excites you — and maybe visit open house events at different schools to get a feel for them.**

👉 You could also consider combining a vocational path with academic options (like EUX), especially if you like practical work but want the option for university later.

If you'd like, tell me:

- What subjects do you enjoy most?
- What do you imagine doing in the future — or what sounds fun to you?
- Would you prefer more classroom learning or more practical/hands-on training?

That way, I can give you even more specific advice! 🚀
